EMERGING MARKET CORPORATE BONDS - AUP USD

ISIN: LU0198719758
Share Class Price: 8.1123

Share Class Launch Date:
31 Aug 2004

The Share Class currency, unless indicated as a Hedged Share Class, is a translated price using exchange rates at the official valuation point of the fund. This is intended as a way to access a Share Class in your chosen currency and does not reduce your overall exposure to foreign currency. The fund currency indicates the highest currency exposure of the fund unless the currency breakdown is detailed in the Weightings % table on page 2.

Investment Objective & Policy

The Fund aims to provide income with the potential to grow the amount you invested over the long term. It looks to outperform the J.P. Morgan CEMBI Broad Diversified Index after the deduction of charges.

At least two-thirds of the Fund's assets will be in bonds (which are similar to a loan and pay a fixed or variable interest rate) issued by companies in emerging markets or companies that have significant operations in emerging markets.

The Fund invests directly in these assets or by using derivatives. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.

Up to 10% of the Fund's assets may be invested in bonds traded on the China Interbank Bond Market using Bond Connect.

Where the Fund invests in bonds that are not priced in US Dollars, the Fund may take measures that aim to mitigate the risk of currency movements against the US Dollar.

The Fund may also invest in asset classes and instruments different from those stated above.

The Fund is actively managed in reference to the J.P. Morgan CEMBI Broad Diversified Index. The index is broadly representative of the securities in which the Fund invests, and provides a suitable target benchmark against which Fund performance will be measured and evaluated over time. The fund manager has discretion to select investments with weightings different to the index, and that are not in the index, and the Fund may display significant divergence from the index.

Deviations from the index, including guidelines on the level of risk relative to the index, will be considered as part of the fund manager's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index.

Past performance is not a guide to future performance. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. The index is unmanaged and cannot be invested directly. All returns assume income is reinvested for a local taxpayer, bid to bid performance (which means performance does not include the effect of any initial charges).

Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- The Fund invests in markets where economic and regulatory risk can be significant. These factors can affect liquidity, settlement and asset values. Any such event can have a negative effect on the value of your investment.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund may invest materially in derivatives. A relatively small change in the value of the underlying investment may have a much larger positive or negative impact on the value of the derivative.
- The Fund may invest in the China Interbank Bond Market (CIBM) via Bond Connect which is subject to regulatory, volatility and liquidity risk, as well as risks associated with settlement, default of counterparties and market suspension. Furthermore, the Fund may incur significant trading, taxation and realisation costs.

Opportunities

- Investment and research process focused towards seeking the best sources of performance.
- Provides exposure to a diversified portfolio of corporate and government bonds.
- Provides exposure to the investment potential of some of the world's fastest growing and most exciting investment markets.
- Managed by a multi-disciplinary team that has experience of a broad range of market conditions.
