R.C.S. Luxembourg B 50 216
(the “SICAV”)

**NOTICE TO THE SHAREHOLDERS OF
CT (LUX) PAN EUROPEAN EQUITY DIVIDEND
(THE “PORTFOLIO”)**

IMPORTANT

8 November 2024

Dear Shareholder,

Important information: Changes to the name, investment objective and policy and Operating Expenses of the Portfolio.

We are writing to let you know that the Board of Directors of the SICAV (the “**Board**”) is making changes to the name, investment objective and policy and Operating Expenses of the Portfolio listed above. The changes to the Operating Expenses will be effective 2 December 2024 and the changes to the name and objective and policy will be effective 12 December 2024.

While the Portfolio will continue to invest in the shares of companies domiciled in Europe (including the UK), following the changes it will seek to achieve capital appreciation rather than income, through investment in a concentrated portfolio of equity securities. The name of the Portfolio will change to CT (Lux) Pan European Focus.

The Portfolio will also promote environmental and social characteristics by integrating a range of responsible investment measures into the investment decision-making process. This will result in the Portfolio being categorised as promoting environmental or social characteristics under Article 8 of the EU Regulation 2019/2088 on sustainability-related disclosures in the financial services sector (known as the Sustainable Finance Disclosure Regulation or “**SFDR**”).

The Board has also resolved to reduce the Operating Expenses charged to certain share classes of the Portfolio.

For any capitalised terms below that are not specifically defined, please refer to the definition in the “Glossary” section of the Prospectus which is available in the document centre of our website www.columbiathreadneedle.com.

What is changing?

From the 12 December 2024, the Portfolio’s name will change to CT (Lux) Pan European Focus.

The investment objective and policy will be amended so that the Portfolio will seek to achieve capital appreciation through investment in a concentrated portfolio of shares of companies domiciled in Europe (including the UK), or which have significant business operations there. Shareholders should note that as the Portfolio will no longer seek to generate income as part of its investment objective, the Portfolio may no longer be suitable for those wishing to take an income from their investment.

The changes to the investment objective and policy are summarised in the Appendix to this notice.

The Portfolio will promote environmental and social characteristics by integrating a range of responsible investment measures into the investment decision-making process, as well as ensuring that the companies in which the Portfolio invest follow good governance practices. From the Effective Date, the Investment Manager will:

Establish a “positive ESG tilt” to the Portfolio

The Investment Manager will aim to create a portfolio that compares favourably against the MSCI Europe Index over rolling 12-month periods, when assessed using the Columbia Threadneedle ESG Materiality Rating Model (the “**Model**”).

This Model (developed and owned by Columbia Threadneedle Investments) builds on the Sustainability Accounting Standards Board (SASB®) materiality framework and identifies the most financially material environmental, social and governance (“**ESG**”) risk and opportunity factors across a wide range of industries, based on subjective indicators.

Where sufficient data is available, the Model gives companies a rating from 1 to 5. These ratings indicate how much exposure a company has to material ESG risks and opportunities in a particular industry. A rating of 1 indicates that a company has minimal exposure to material ESG risks and a rating of 5 indicates that a company has a higher exposure to such risks. The ratings are used by the Investment Manager to identify and assess potential material ESG risk and opportunity exposures in the securities held or considered for investment by the Portfolio, as part of its decision-making process.

Whilst the Portfolio may still invest in companies with a low rating (rating of 4 or 5), the Investment Manager favours companies which score highly (rating of 1-3) on the Model, giving the Portfolio a positive tilt in favour of ESG characteristics when compared with those of the MSCI Europe index, on a rolling 12-month basis.

Introduce a set of ESG exclusions

The Portfolio will not invest in companies which derive a certain level of their revenue from industries or activities such as, but not limited to, tobacco production, thermal coal power generation and conventional weapons. The Portfolio will also exclude companies that breach international accepted standards, such as the United Nations Global Compact. The exclusion criteria may be extended or revised from time to time.

Highlight our engagement with companies

The Investment Manager will engage with companies with a view to influencing management teams to address ESG risks and improve their ESG practices, ranging from carbon emissions to board independence and diversity.

Commit to investing in a minimum proportion of Sustainable Investments and to consider Principal Adverse Impacts

In addition, the Investment Manager will consider the principle adverse impacts (PAIs) of its investment decisions that may negatively harm sustainability factors through a combination of exclusions, investment research and monitoring and engaging with investee companies.

Additionally, the Investment Manager will commit to holding a minimum proportion of 20% of its assets in sustainable investments, as further detailed in the SFDR RTS Annex of the Portfolio. For the avoidance of doubt, the Portfolio will not have a sustainable investment objective.

The changes have been summarised in the Appendix attached and will be reflected in the investment policy of the Portfolio in the “Investment Objectives and Policies” section of the Prospectus and the corresponding SFDR RTS Annex from the Effective Date.

Reduction in Operating Expenses

From the 2 December 2024, the Operating Expenses for certain Share Classes of the Portfolio will be reduced, as follows:

Share Class	Current Operating Expenses	From the Effective Date
A Shares	0.30%	0.20%
D Shares	0.30%	0.20%
I Shares	0.15%	0.10%
L Shares	0.15%	0.10%
Z Shares	0.30%	0.15%

Why are we making these changes?

A review of the Portfolio concluded that its future viability will be best secured by making the changes set out in this notice. The Investment Manager already manages a Pan European Focus fund within its UK-domiciled fund range, which has a strong track record of investment performance, and believes it will be beneficial to make such a fund available to a wider range of investors in Europe.

Following the introduction of SFDR, investors are increasingly requiring investment funds to embed the promotion of environmental and social characteristics into their investment process. By making these changes to the investment policy of the Portfolio, this will become a binding commitment and the changes will also make the Portfolio suitable for investors with certain sustainability preferences under MiFID II (the Markets in Financial Instruments Directive and Markets in Financial Instruments Regulation - collectively known as MiFID II).

What do I need to do?

You do not need to do anything as a result of these changes, which will take effect automatically on the Effective Date.

What can I do if I disagree with the changes?

Shareholders may redeem their shares in the Portfolio, or exchange their shares into shares of an alternative Portfolio of the Columbia Threadneedle (Lux) I SICAV, free of any charges, by submitting a written request to the Registrar and Transfer Agent: International Financial Data Services (Luxembourg) S.A. until 15.00 Luxembourg time on 11 December 2024. Such redemption or exchange requests will be processed in the normal manner in accordance with the "Redemption of Shares" section of the Prospectus. Contact details for our Transfer Agent are available below.

Additional information

If you have any other questions regarding this notice, please speak to your financial adviser. Please note that we are unable to provide financial or tax advice.

Should you require any further information, please do not hesitate to contact our Transfer Agent:

Promotion of Environmental and Social Characteristics Summary

The Investment Manager promotes environmental and social characteristics by integrating a range of responsible investment measures into the investment decision-making process, as well as ensuring that the companies in which the Portfolio invests follow good governance practices.

The Portfolio aims to compare favourably against the MSCI Europe Index over rolling 12-month periods, when assessed using the Columbia Threadneedle ESG Materiality Rating Model (the "Model").

This Model (developed and owned by Columbia Threadneedle Investments) builds on the Sustainability Accounting Standards Board (SASB®) materiality framework and identifies the most financially material environmental, social and governance risk and opportunity factors across a wide range of industries, based on subjective indicators.

Where sufficient data is available, the output of the Model is a rating from 1 to 5. The ratings indicate how much exposure a company has to material ESG risks and opportunities in a particular industry. A rating of 1 indicates that a company has minimal exposure to material ESG risks and a rating of 5 indicates that a company has a higher exposure to such risks. These ESG Materiality ratings are used by the Investment Manager to identify and assess potential material ESG risk and opportunity exposures in the securities held or considered for investment by the Portfolio, as part of its decision-making process. The Investment Manager favours companies which score highly (rating of 1-3) on the Model, giving the Portfolio a positive tilt in favour of ESG characteristics when compared with those of the MSCI Europe Index, on a rolling 12-month basis.

The Investment Manager must invest at least 50% of the Portfolio in companies that have a strong ESG Materiality rating (1 to 3). In exceptional circumstances, the Investment Manager may (i) assess companies that are not covered by its ESG Materiality Rating Model using its own research, (ii) rely on its own research to depart from a rating produced by its ESG Materiality Rating Model that it considers to be inaccurate, (iii) engage with companies that have either a low ESG Materiality rating, or are not covered by its ESG Materiality Rating Model, for improvement, or (iv) include companies that have either a low ESG Materiality rating, or are not covered by its ESG Materiality Rating Model, that qualify as sustainable investments, to achieve this 50% minimum commitment.

The Investment Manager ensures that at least 90% of the total net assets of the Portfolio excluding investments in ancillary liquid assets, bank deposits, Money Market Instruments or money market funds for liquidity or treasury purposes are assessed by the Model.

The Portfolio does not invest in companies which derive revenue from industries and activities above the thresholds shown below:

Threshold Exclusions		
Exclusion	Factor	Revenue Threshold
Tobacco	Production	5%
Thermal Coal	Power Generation	30%
	Extraction	30%
Conventional Weapons	Military weapons	10%
	Civilian Firearms	10%
Nuclear Weapons	Indirect products and services	5%
Full Exclusions		
Controversial Weapons		
Nuclear Weapons - Direct involvement: issuers involved in warheads and missiles, fissile material, exclusive-use components		

These exclusion criteria may be extended or revised from time to time.

The Portfolio excludes companies that breach international standards and principles, as determined by the Investment Manager, such as:

- the United Nations Global Compact;
- the International Labour Organization Labour Standards; and
- the United Nations Guiding Principles on Business and Human Rights

In line with its engagement policy, the Investment Manager may engage with companies that have poorer ESG Materiality Ratings to encourage improvement of their ESG practices over time on issues ranging from climate change to board independence and diversity.

While the Portfolio does not have a sustainable investment objective, it will hold a minimum proportion of 20% of sustainable investments with an environmental or social objective.

The Investment Manager considers the principal adverse impacts (“PAIs”) of its investment decisions for this Portfolio that may negatively harm sustainability factors through a combination of sector and thematic exclusions, investment research and monitoring and engaging with investee companies in respect of the PAI indicators detailed in the SFDR RTS Annex of the Prospectus.

The Portfolio is categorised as one that promotes environmental or social characteristics under Article 8 of the EU Regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).

Further information about the environmental or social characteristics promoted by the Portfolio and their integration into the investment process is available in the SFDR RTS Annex of the Prospectus.

Please also refer to the General Sustainability Disclosures Appendix of the Prospectus for further information.
