8. RISK FACTORS

8.1 General

You should consider and satisfy yourself as to the risks of investing in the Fund. There can be no assurance that the Fund will achieve its investment objectives. You should be aware that the price of Shares

in the Fund, and the income from them, may fall or rise and you may not get back your original investment in the Fund.

8.2 Specific risks

You should refer to Schedule 1 to this Singapore Prospectus in the section relating to the Fund for the specific risks which may apply to the Fund.

8.2.1 Market risks

You should note that the value of investments can fall as well as rise and you may not get back the sum originally invested, especially if investments are not held for the recommended investment timeframe for the Fund.

Your investment may go up or down due to changing economic, political or market conditions that impact the price of securities that the Fund invests in. Any geographical concentration of the Fund may add more volatility to the Fund than a more broadly diversified portfolio.

The Fund may incur losses due to declines in the value of one or more securities in which it invests. These declines may be due to factors affecting a particular issuer, or the result of, among other things, political, regulatory, market, economic or social developments affecting the relevant market(s) more generally. In addition, turbulence and reduced liquidity in financial markets may negatively affect many issuers, which could adversely affect the Fund’s ability to price certain assets in thinly traded and closed markets, and could also lead to significant redemptions and operational challenges. Global economies and financial markets are increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. These risks may be magnified if certain events or developments adversely interrupt the global supply chain; in these and other circumstances, such risks might affect companies worldwide. As a result, local, regional or global events such as terrorism, civil conflicts and war, natural disasters, disease/virus outbreaks and epidemics or other public health issues, recessions, depressions or other events – or the potential for such events – could have a significant negative impact on global economic and market conditions.

8.2.2 Exchange rate risks

You should note that where investments of the Fund are made in assets that are denominated currencies other than the reference currency of the Fund, changes in exchange rates may affect the value of the Fund’s investments.

You should also note that where the Fund’s currency or the relevant Share Class’ currency is different from your home currency, changes in exchange rates may affect the value of your investments.

You may therefore be exposed to exchange rate risks. The Investment Manager currently does not intend to actively hedge any foreign currency exposure except for Portfolio Currency Hedged Share Classes and Reference Currency Hedged Share Classes.

Further information on hedging for the Portfolio Currency Hedged Share Classes and Reference Currency Hedged Share Classes is set out in the Base Prospectus under the section headed “HEDGED SHARE CLASSES”. There can be no guarantee that the hedging strategy applied in Hedged Share Classes will entirely eliminate the adverse effects of changes in exchange rates between the Reference Currency or Portfolio Currencies and the Hedged Currency.

8.2.3 **Portfolio Concentration risks**

If the Fund has a concentrated portfolio (holds a limited number of investments and/or has a restricted investment universe) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund’s value.

8.2.4 **Volatility risks**

The Fund may exhibit significant price volatility.

8.2.5 **Liquidity risks associated with redemptions of Shares**

The Fund is not listed in Singapore and there is no secondary market for the Fund in Singapore. Therefore, Singapore investors can only redeem their Shares by submitting redemption requests as described in this Singapore Prospectus. In addition, in certain circumstances, your right to redeem your Shares may be suspended or your redemption may be deferred for a period.

8.2.6 **Risks relating to the use of derivatives for efficient portfolio management**

Where the Fund invests in derivatives with the aim of reducing risk or minimising the cost of transactions, such derivative transactions may benefit or negatively affect the performance of the Fund. The Investment Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.

8.2.7 **COVID-19**

The pandemic caused by coronavirus disease 2019 and its variants (“COVID-19”) has resulted in, and may continue to result in, significant global economic and societal disruption and market volatility due to disruptions in market access, resource availability, facilities operations, imposition of tariffs, export controls and supply chain disruption, among others. Such disruptions may be caused, or exacerbated by, quarantines and travel restrictions, workforce displacement and loss in human and other resources. The impacts, as well as the uncertainty over impacts to come, of COVID-19 – and any other infectious illness outbreaks, epidemics and pandemics that may arise in the future – could negatively affect global economies and markets in ways that cannot necessarily be foreseen. In addition, the impact of infectious illness

outbreaks and epidemics in emerging market countries may be greater due to generally less established healthcare systems, governments and financial markets. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The disruptions caused by COVID-19 could prevent the Fund from executing advantageous investment decisions in a timely manner and negatively impact the Fund’s ability to achieve their investment objectives. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund.

8.2.8 **Sustainability Risk**

Sustainability risk is defined as “an environmental, social or governance (“ESG”) event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment”. The Fund is exposed to sustainability risk. Its strategy is potentially (rather than actually) exposed to ESG events or conditions that, if occurring, could cause a material negative impact on the value of the investment.

8.2.9 **Russia – Ukraine**

The large-scale invasion of Ukraine by Russia in February 2022 has resulted in sanctions and market disruptions, including volatility in regional and global stock and commodities markets and significant devaluations of Russian currency. The extent and duration of the military action are impossible to predict but could be significant. Market disruption caused by the Russian military action, and any counter measures or responses thereto (including international sanctions, a downgrade in the country’s credit rating, purchasing and financing restrictions, boycotts, tariffs, changes in consumer or purchaser preferences, cyberattacks and espionage) could have a severe adverse impact on regional and/or global securities and commodities markets, including markets for oil and natural gas. These and other related events could have a negative impact on Fund performance and the value of an investment in the Fund.

8.2.10 **Others**

Information on other risks which you should consider before investing in the Fund is set out in the Base Prospectus under the section headed “RISK FACTORS” and, where applicable, in the section relating to the relevant Fund under “INVESTMENT OBJECTIVES, POLICIES AND OTHER DETAILS OF THE FUNDS” section of the Base Prospectus.

The above should not be considered to be an exhaustive list of the risks which you should consider before investing into the Fund. You should be aware that an investment in the Fund may be exposed to other risks of an exceptional nature from time to time.

9. SUBSCRIPTION FOR SHARES

9.1 Subscription Procedure

You may purchase Shares through Singapore distributors appointed by the ACD for the Fund (“Singapore Distributors”).

Your application for Shares should be made on the application form prescribed by the Singapore Distributor through whom you are purchasing Shares. You must send your properly completed application form, together with any relevant supporting documents and the payment for the Shares as may be advised by the Singapore Distributor, to the Singapore Distributor.

Details on the terms and conditions of subscriptions are set out in the Base Prospectus under the sections headed “BUYING, SELLING, SWITCHING AND CONVERSION OF SHARES” and “BUYING SHARES”.

You should also contact the relevant Singapore Distributor to check whether any additional terms and conditions are imposed by such Singapore Distributor.

9.2 Minimum Initial Subscription Amount and Minimum Subsequent Subscription

The minimum initial subscription amount and minimum subsequent subscription amount for the Fund is set out in Schedule 1 to this Singapore Prospectus in the section relating to the Fund. The ACD may at its discretion accept subscriptions lower than the minimum amount.

Singapore Distributors may impose different amount requirements on their clients and you should check with the relevant Singapore Distributor whether any such requirements are imposed.

9.3 Dealing Deadline and Pricing Basis

The Company deals on a forward pricing basis. A forward price is the price calculated at the next Valuation Point after the purchase or redemption of Shares is agreed. Accordingly, the issue price of Shares shall not be ascertainable at the time of application. The issue price of Shares is based on the Net Asset Value of the relevant Share Class which will vary from day to day.

Further details are set out in the Base Prospectus under the sections headed “BUYING SHARES”, “PRICE PER SHARE IN EACH FUND AND EACH CLASS” and “OTHER DEALING INFORMATION”.

The Net Asset Value per Share of each Class of the Fund is calculated as of each Valuation Point on a Dealing Day. Information on the calculation of the Net Asset Value is set out in the Base Prospectus under the section headed “VALUATION OF THE COMPANY”.

If you purchase Shares before the Singapore time equivalent of 12 noon (UK time) (the “Cut-Off Time”) on a Dealing Day, you will pay the price calculated on that Dealing Day. If you purchase Shares after the Cut-Off Time on a Dealing Day, you will pay the price calculated on the next Dealing Day.

As investors in Singapore must place orders for subscription through a Singapore Distributor, orders may only be placed during the opening hours for that Singapore Distributor. You should therefore confirm the

applicable deadline by which your subscription application form must be received and the dealing procedures for that Singapore Distributor.

9.4 Numerical Example of How Shares are Allotted

The following is an illustration of the number of Shares that will be issued based on an initial subscription amount of \$1,000, a notional issue price of \$1.00 per Share and a notional Initial Charge of 5%. The notional issue price is for illustrative purposes only, and the actual issue price will fluctuate according to the Net Asset Value of the relevant Share Class as well as the applicable Initial Charge:

\$1,000	–	\$50	=	\$950	÷	\$1.00	=	950 Shares
<i>Initial</i>		<i>Notional</i>		<i>Net</i>		<i>Notional</i>		<i>Shares</i>
<i>Subscription</i>		<i>Initial</i>		<i>Subscription</i>		<i>Issue</i>		<i>Issued</i>
<i>Amount</i>		<i>Charge</i>		<i>Amount</i>		<i>Price</i>		
		<i>of 5%</i>						

9.5 Trade Confirmations

You should contact your Singapore Distributor for details on when you may expect to receive a trade confirmation confirming ownership of the number of Shares issued to you as the trade confirmation policy may vary amongst Singapore Distributors.

9.6 Cancellation of Subscription

You should note that the ACD does not offer you the right to cancel subscriptions into the Fund. You may wish to check with Singapore Distributors through whom you wish to purchase the Shares whether that Singapore Distributor will allow you to cancel subscriptions into the Fund.

10. REGULAR SAVINGS PLAN (RSP)

Investment into the Fund by way of a regular savings plan (“RSP”) is currently not offered by the ACD.

You may wish to check with the Singapore Distributors whether any RSP is offered for the Fund and, if so, the applicable terms and conditions on which the RSP is being offered.

11. REDEMPTION OF SHARES

11.1 Redemption Procedure

You must redeem your Shares via the same Singapore Distributor through whom you originally purchased your Shares.

You may redeem your Shares on any Dealing Day, subject to the opening hours of the Singapore Distributors.

Your order for redemption of Shares should be made on a share redemption form as may be prescribed by the relevant Singapore Distributor. You must send your properly completed redemption form, together with such documents as may be required by the Singapore Distributor, to the Singapore Distributor.

You should note that if a Shareholder requests the redemption or cancellation of Shares the ACD may, where it considers the deal to be substantial in relation to the total size of the Fund concerned, arrange that in place of payment of the price of the Shares in cash, the Company cancels the Shares and transfers the Scheme Property or, if

required by the Shareholder, the net proceeds of sale of the relevant Scheme Property, to the Shareholder. This redemption or cancellation process is controlled by the Depositary under the Financial Conduct Authority Rules (COLL 6.2.15) and the Depositary must take reasonable care to ensure the Scheme Property concerned would not be likely to result in material prejudice to the Shareholders.

Details on the terms and conditions of redemptions are set out in the Base Prospectus under the sections headed “BUYING, SELLING, SWITCHING AND CONVERSION OF SHARES”, “SELLING SHARES” and “IN SPECIE REDEMPTIONS”. In times of high redemptions, where requested redemptions exceed 10% of the Fund’s value, to protect the interests of continuing Shareholders, the ACD may defer redemptions. Further details are set out in the Base Prospectus under the section headed “DEFERRED REDEMPTION”.

You should also contact the relevant Singapore Distributor to check whether any additional terms and conditions are imposed by such Singapore Distributor.

11.2 Minimum Holding Amount and Minimum Redemption Amount

The minimum holding amount and minimum redemption amount for the Fund is set out in Schedule 1 to this Singapore Prospectus in the section relating to the Fund.

Part of a Shareholder’s holding may be redeemed but the ACD reserves the right to refuse a redemption request if the value of the Shares of the Fund to be redeemed is less than the minimum redemption amount.

If your holding is below the minimum holding the ACD has the discretion to require redemption of your entire holding.

Singapore Distributors may impose a different minimum holding amount or a different minimum redemption amount on their clients and you should check with the relevant Singapore Distributor whether any such requirements are imposed.

11.3 Dealing Deadline and Pricing Basis

Shares shall be redeemed on a forward pricing basis i.e. the redemption price is calculated at the next Valuation Point after the redemption is agreed. Accordingly, the redemption price of Shares will not be ascertainable at the time of the redemption request. The redemption price of Shares is based on the Net Asset Value of the relevant Share Class which will vary from day to day.

Further details are set out in the Base Prospectus under the sections headed “SELLING SHARES”, “PRICE PER SHARE IN EACH FUND AND EACH CLASS” and “OTHER DEALING INFORMATION”.

The Net Asset Value per Share of each Class of the Fund is calculated as of each Valuation Point on a Dealing Day. Information on the calculation of the Net Asset Value is set out in the Base Prospectus under the section headed “VALUATION OF THE COMPANY”.

If you sell your Shares before the Cut-Off Time (as set out in paragraph 9.3 above) on a Dealing Day, you will receive the price calculated on that Dealing Day. If you sell your Shares after the Cut-Off Time on a Dealing Day, you will receive the price calculated on the next Dealing Day.

As investors in Singapore must place orders for subscription through a Singapore Distributor, orders may only be placed during the opening hours for that Singapore Distributor. You should therefore confirm the applicable deadline by which the redemption order must be received and the dealing procedures for the relevant Singapore Distributor.

11.4 Numerical examples of calculation of redemption proceeds

The following is an illustration of the redemption proceeds payable based on a redemption order for 1,000 Shares and a notional redemption price of \$1.10 per Share. The notional redemption price is for illustrative purposes only, and the actual redemption price will fluctuate according to the Net Asset Value of the relevant Share Class as well as any applicable Redemption Charge:

1,000 Shares x	\$1.10	=	\$1,100	–	\$0	=	\$1,100
<i>Redemption request</i>	<i>Redemption Price</i>		<i>Gross Redemption Proceeds</i>		<i>Redemption Charge*</i>		<i>Net Redemption Proceeds</i>

*There is currently no redemption charge payable.

11.5 Payment of Redemption Proceeds

Information on the payment of redemption proceeds is set out in the Base Prospectus under the section headed “SELLING SHARES”.

If you have invested via a Singapore Distributor, redemption proceeds will normally be paid to the Singapore Distributor (within 4 UK business days). You will receive the proceeds of redemption from your Singapore Distributor as agreed between you and your Singapore Distributor.

You should contact your Singapore Distributor for further details (including the period within which the redemption proceeds will be paid out to you by the Singapore Distributor) as the payment policy amongst the Singapore Distributors may vary. The cost of any settlement by telegraphic transfer may be passed on to you.

11.6 Compulsory Redemptions

Information on circumstances under which Shares may be compulsorily redeemed is set out in the Base Prospectus under the section headed “RESTRICTIONS AND COMPULSORY TRANSFER AND REDEMPTION”.

12. SWITCHING AND CONVERTING

Information on Switching and Converting is set out in the Base Prospectus under the sections headed “BUYING, SELLING, SWITCHING AND CONVERSION OF SHARES” and “SWITCHING/ CONVERTING”.

You may Switch or Convert your Shares by completing the switching or converting form prescribed by the Singapore Distributor through

whom you originally purchased your Shares and sending your properly completed switching or converting form, together with such documents as may be required by the Singapore Distributor, to the Singapore Distributor.

You should note in addition that, as a condition of your Switches or Conversions, the new fund or share class subscribed into as a result of the Switch or Conversion must be available to you for subscription.

The ACD may carry out a compulsory Conversion between different Class of Shares of the Fund, in whole or part, where the ACD reasonably believes it is in the interests of Shareholders to do so and the ACD has given Shareholders notice of the Conversion in accordance with FCA Rules. The ACD will not apply any fees where it carries out a compulsory conversion of Shares.

13. OBTAINING PRICE INFORMATION IN SINGAPORE

The issue prices and redemption prices of the Shares of the Fund are normally published in Singapore on www.columbiathreadneedle.sg within one Singapore business day immediately succeeding each Dealing Day.

14. LIQUIDITY RISK MANAGEMENT

The Company has in place liquidity risk management tools, such as the ability to suspend redemptions in certain situations to help manage the liquidity of the Fund in various ways, as described below. Such tools may, in the relevant circumstances, impact your redemption rights. Please refer to the section "OTHER DEALING INFORMATION" for more information.

Suspension of dealings: The Company may suspend the issue or redemption of Shares in certain circumstances. Circumstances under which the issue or redemption of Shares may be suspended and information on such suspension are set out in the Base Prospectus under the section headed "SUSPENSION OF DEALINGS IN THE COMPANY".

Dilution adjustment: Under certain circumstances, large volumes of subscriptions or redemptions may have an adverse effect on the Shareholders' interest in the Fund. In order to prevent this effect, called "dilution", the ACD has the power to apply a "dilution adjustment" to the subscription and/or redemption of Shares. Please refer to the section headed "Dilution adjustment" and "Calculation of "Dilution Adjustment" for more details.

16. SOFT DOLLAR COMMISSIONS / ARRANGEMENTS

The ACD and the Investment Manager do not currently receive any goods and services from broker-dealers paid through research commission charges incurred on transactions undertaken for the Company (soft dollars). The Investment Manager acquires these services (e.g. investment research) from its own expenses. The cost of execution (execution commission) is separate from the cost of research and continues to be paid for out of the Company's own expenses.

Details specific to the CT European Select Fund are set out below:

I. Investment objective and policy

The investment objective of the CT European Select Fund is to achieve above average capital growth over the long term. It looks to outperform the FTSE World Europe ex UK Index over rolling 3-year periods, after the deduction of charges. The CT European Select Fund is actively managed, and invests at least 75% of its assets in a concentrated portfolio of shares of companies domiciled in Continental Europe, or which have significant Continental European business operations.

These companies may be chosen from any industry or economic sector, with significant sector and share weightings taken at the Investment Manager's discretion. There is no restriction on company size, however, investment tends to focus on larger companies, such as those included in the FTSE World Europe ex UK Index.

The CT European Select Fund may invest in other securities (including fixed interest securities) and collective investment schemes (including funds managed by Columbia Threadneedle companies), when deemed appropriate.

As at the date of the Base Prospectus, the ACD does not intend to make use of this power, however, the ACD reserves the right to do so without notice to Shareholders at a future date.

Should the CT European Select Fund use derivatives, the global exposure relating to derivatives held in the CT European Select Fund may not exceed the net value of the Scheme Property and the ACD will use a commitment approach (as described in paragraph 42 of Appendix II of the Base Prospectus) to measure the exposure of the CT European Select Fund.

Notes:

- Performance returns are calculated in the currency of the relevant Share Class on a single pricing basis (taking into account any applicable subscription charge) and on the assumption that all dividends and distributions made by the relevant Share Class are reinvested, taking into account all charges which would have been payable upon such reinvestment.
- Performance returns of the benchmark are calculated in the currency of the relevant Share Class (converted based on prevailing exchange rates at the relevant time, where applicable) on a bid-to-bid basis.
- Other Share Classes which may be available to investors in Singapore for subscription pursuant to this Singapore Prospectus but which have not been included in the above table have either not been incepted or have been incepted for less than one year as at the date of this Singapore Prospectus. To find out more about this, please visit www.morningstar.com.

6. Performance returns are calculated based on prices after factoring in dilution adjustments. Apart from the value of the underlying investments of the Fund, performance returns of the Fund may be influenced by the application of the dilution adjustments which may increase the variability of the Fund's returns.

Past performance of the Fund and its benchmarks is not necessarily indicative of the future performance of the Fund.
