

IFR Disclosures

BMO Asset Management
Netherlands BV

Purpose

Under Pillar 3 of IFR/IFD, the Company is required to disclose information relating to its risks, regulatory capital, remuneration policy and risk management objectives and policies. This document sets out BMO Asset Management Netherlands BV's (or "BMO NL") disclosures as required under Part Six, "Disclosure By Investment Firms", of the IFR, as at 31 October 2021.

Background

The Company is subject to an EU-prescribed Investment Firm Regulation (IFR), which is directly binding on firms, and an Investment Firm Directive (IFD), which is transcribed into national law for Dutch investment firms by the Dutch Central Bank. Upon implementation on 26 June 2021, the IFR/IFD superseded the Capital Requirements Regulation and the Capital Requirements Directive, referred to together as CRD IV, which previously applied to the Company.

IFR/IFD requires the Company to conduct an Internal Capital and Liquidity Risk Assessment Process, on an annual basis, referred to as the Pillar 2 requirement. The objective of this process is to ensure that companies maintain adequate capital and liquidity to enable them to manage risks not deemed to be adequately covered under the Pillar 1 minimum requirements, and ensure that they would be able to wind down in an orderly manner, if need be. This is a forward-looking exercise which includes stress testing major risks, considering how the Company would cope with a significant market downturn for example, and an assessment of the Company's ability to mitigate the risks.

The Company maintained a surplus of capital over its regulatory requirements on both a Pillar 1 and Pillar 2 basis throughout the years ended 31 October 2021 and 31 October 2020, and a surplus of liquidity over its liquidity requirement since the implementation of the IFR/IFD.

It should be noted that after the date of these disclosures, the Company, as part of the broader BMO GAM business in EMEA (Europe, the Middle East and Africa), was acquired by Ameriprise Financial, Inc. (Ameriprise) on 8 November 2021, becoming part of Columbia Threadneedle Investments (CTI).

Source: BMO Global Asset Management as at 31.10.2021.

Scope and application of disclosure requirements

The disclosures in this document relate to BMO Asset Management Netherlands BV, which at the date of this disclosure, 31.10.2021, was ultimately a wholly owned subsidiary of the Bank of Montreal and therefore part of the Bank of Montreal Financial Group (“BMO Financial Group”).

BMO NL is authorised as an Alternative Investment Fund Manager (AIFM), with MiFID top-up permissions, by the AFM. It remains regulated by the Dutch Central Bank for prudential supervision purposes.

Frequency and means of disclosure

The capital and risk disclosures required under Pillar 3 are required to be produced at least annually and published in conjunction with the publication of the Annual Report and Financial Statements. BMO NL has an accounting reference date of 31 October, however, its prudential regulatory reporting requirement is on a calendar quarterly basis, therefore, due to the non-alignment between the year-end date and the prudential regulatory reporting date, the Company is required by the Dutch Central Bank to submit to it a special purpose financial report as at 30 September which is subject to verification via an independent audit process. The regulatory capital position disclosed in this document is therefore based on the Company’s financial position as set out in the Special Purpose Financial Report as at 30 September 2021.

None of the disclosures are subject to audit and have been produced solely for the purposes of satisfying the Pillar 3 regulatory requirements.

Risk management objectives and policies

The Group manages investments from multiple investment centres including London, Edinburgh and Amsterdam. The Company operated branches located in Germany, Sweden, Spain and France during the year ended 31 October 2021. The Company's Italian branch was closed in October 2020. These branches distribute a broad range of products supporting both the Company and the wider BMO GAM business.

Our service offering is built on a strong control environment, dependable processes and an effective framework to manage the risks we face. Good Governance and management control is fundamental to the success of our operations, supporting prudent and measured risk-taking, while striking a balance between risk and return.

Risk-taking and risk management activities are guided by our Risk Principles:

- management of risk is a responsibility at all levels of the organisation;
- material risks to which the enterprise is exposed must be identified, measured, managed, monitored and reported;
- risk identification and measurement will include both qualitative and quantitative elements. This includes views of risk relative to the external operating environment and stress testing and scenario analysis;
- decision-making is based on a clear understanding of risk, supported by robust management information and analysis.

Our risks are typical to those of investment managers and primarily fall under the categories of financial risk, operational/business risk and strategic risk. It is important to note that all risks are monitored and managed as part of a governance and risk management framework which is consistently applied across all firms within the Group. The governance of the Company is implemented and overseen by the Board of BMO NL, with appropriate escalation to and overarching governance provided by the Board of BMO Asset Management (Holdings) plc (BAMH plc), a direct, and the sole subsidiary of BMO Global Asset Management (Europe) Limited, the parent company of the Group.

Control environment

The Company, in line with Group policy, is committed to high standards of business conduct and seeks to maintain these together with an ethical culture across all areas of its business and in all jurisdictions in which it operates. The Company has procedures for reporting and resolving matters that do not meet the required standards of business conduct.

The Company has an appropriate organisational structure for planning, executing, managing and monitoring business operations in order to achieve its objectives. This structure is designed to provide clear responsibilities and a control framework for key areas of the Company's business.

A Governance structure is in place within the wider Group to manage and escalate any material risks which includes: Audit & Compliance Committee, Risk & Remuneration Committee and the BAMH plc Board which operate as an integral part of the broader Bank of Montreal Governance structure.

The Executive and Senior Management Team are ultimately responsible for establishing and maintaining effective systems and controls, although all employees have a role to play in managing and controlling risk.

Operational responsibility for the control environment rests with the BMO GAM Chief Executive and is devolved through a documented executive structure with clearly delegated and appropriate levels of authority. Executive Directors are, therefore, accountable for the operation of the systems of internal controls within the Group's business. The Group operates a three lines of defence model with independent risk, compliance and internal audit functions.

The Business Risk team supports the BAMH plc Board and Bank of Montreal in discharging their duty to ensure that effective systems and controls are in place. The Business Risk team operates independently of any other business line, investment team or function. The key objective of the Business Risk team is to assist in developing and implementing a robust risk and control framework, as approved by the BAMH plc Board and BMO, which will enable risks to be identified and assessed across the Group, including the Company, managed within acceptable tolerance levels, monitored on a regular basis and reported to management in a timely manner.

Source: BMO Global Asset Management as at 31.10.2021.

The Group also has a separate first line business unit compliance office (BUCO) team, Compliance and Internal Audit functions. On a day-to-day basis the risk framework is owned by the Business Risk function and the risk processes are managed via the Business Risk and Compliance teams, including the Company's dedicated Compliance officer.

Investment risk is managed at the individual investment desk level with oversight from a dedicated Investment Risk Oversight function, with the Company also having its own Head of Investment Risk Oversight. They assist with oversight of material outsourcings and chair investment risk and valuation and pricing governance Committees, when the Company's products and mandates are reviewed. The Investment Risk Oversight team is responsible for assessing and challenging Group-wide activities that give rise to investment risk. The team's remit is to provide independent oversight on the effectiveness of all fund managers in managing the investment risk in their portfolios.

The Investment Mandate Compliance function, part of the BUCO team, is responsible for the coding of investment restrictions within the order management system for pre and post trade compliance monitoring. They investigate any breaches and report accordingly to senior management.

Internal Audit provides independent, objective assurance on the control framework.

The Company also participates in quarterly close supervision meetings with local regulators, the DNB and AFM.

Monitoring and Corrective Action

Compliance and Internal Audit conduct regular monitoring of various business areas and control procedures in line with an agreed plan.

Any issues of significance are brought to the attention of the BMO NL Board, with escalation where appropriate, to the Audit & Compliance Committee (ACC) through the regular reporting process. Planned corrective actions are independently monitored for timely completion and reviewed by the ACC.

A formal annual report on internal controls is produced for clients providing assurance on both the design and the operating effectiveness of control procedures, primarily focused on BMO Asset Management Limited and the Company. The report follows the International Standard on Assurance Engagements (ISAE) No. 3402 as well as the Audit & Assurance Faculty ("AAF") guidelines established by the ICAEW.

Source: BMO Global Asset Management as at 31.10.2021.

Approach to Operational/Business and Strategic Risk

The identification of major operational/business and strategic risks is carried out by management, and procedures to manage and monitor these risks, are reviewed and agreed.

Business Risk produce regular reporting to the Board. This highlights changes to risk ratings and significant risk events and other pertinent items identified in relation to the Company. Escalation is also made to the BAMH plc Board where appropriate.

The Business Risk function facilitates the identification and documentation of risk in the business and helps the business identify mitigating actions in accordance with the BMO Financial Group Risk Management Corporate Policy and Risk Appetite Statement. In addition, any business incidents or risk events, including investment mandate breaches, are reported by the business to the risk team and they are recorded and actively monitored until resolved. Process and control enhancements to prevent reoccurrence are also considered as part of resolution.

Approach to Financial Risk

The Company adheres to the Group's risk management objectives and policies applicable to this disclosure and with specific regard to capital requirements, counterparty credit risk, concentration risk, liquidity risk and market risk which are summarised below.

The Group adopts a low risk approach to treasury management and seeks to ensure that its capital is preserved and financial risks are managed appropriately.

The Company's corporate treasury activities are managed by the Group Finance function within parameters defined by the Board and the Counterparty Credit Committee (CCC).

The regulatory capital positions of the Company are reported to the Board on a regular basis.

The Counterparty Risk Team (CRT) manage new counterparty / broker requests, undertaking both quantitative and qualitative assessments and due diligence before making appropriate recommendations for approval / rejection by the CCC. The CRT also undertake daily monitoring and conduct formal annual reviews of all money market counterparties.

Source: BMO Global Asset Management as at 31.10.2021.

The Company is exposed to a number of financial risks in the normal course of its business. The associated Group risk management processes have been designed to manage these risks and recognise that treasury management operations are specifically not treated as a profit centre. The key aspects are detailed below:

- Board policy prohibits the establishment of borrowing facilities without the prior approval of the Board. The Company currently has no debt.
 - Placing of funds on deposit is short term only (maximum term 90 days) – unless approved by the Chief Operating Officer or Chief Executive Officer.
 - Deposits may only be placed with counterparties approved by the CCC, and the Board sets the appropriate limit of exposure to any one counterparty.
 - Board policy prohibits the use of derivatives including futures, options and forward contracts, without prior Board approval.
 - Exposure to cash and cash equivalent balances held in foreign currency is managed to reduce the risk of adverse movements in exchange rates, where appropriate, by the repatriation of surplus foreign currency into Euro-denominated accounts.
- The Company is exposed to the effects of fluctuations in the prevailing levels of market interest rates on its financial assets.
 - The Company does not hold a trading book or have the regulatory permissions to deal on its own account and therefore, the concentration K-Factor, K-CON, does not apply. Concentration risk regarding clients and their associated revenues is closely monitored and considered within the Company's ICLAAP stress tests.
 - The overall objective of liquidity risk management in the Company is to ensure that there is sufficient liquidity over short and medium time horizons to meet the needs of the business (e.g. funding working capital and capital expenditure). Working capital is monitored on a weekly basis to ensure that settlement of all forthcoming liabilities can be met. This activity includes monitoring of cash on deposit, having regard to capital and liquidity requirements, and helps drive the timely collection of debts. The Group's Finance function includes a Treasury team which ensures that short-term cash-flow requirements are met while seeking to maximise the amount of cash on deposit.

Summary of remuneration policy and practices

The Company (including its branches) is subject to the Regulation on Sound Remuneration Policies (Regeling Beheerst Beloningsbeleid, hereinafter "RBB") and the Dutch Financial Supervision Act (Wet op het financieel toezicht (Wft)) in which the Dutch Act on Remuneration Policies of Financial Undertakings (Wet beloningsbeleid financiële ondernemingen - hereinafter "Wbfo") has been implemented.

The Company's remuneration policy and practice are subject to the regulatory requirements on remuneration described in the Dutch Remuneration Regulations. The policy also aligns to the principles and structure of the BMO Global Asset Management EMEA Remuneration Policy. The key provisions are as follows:

- i. The Company provides a total remuneration package comprising of base salary, a competitive benefits suite and the opportunity to earn an annual discretionary bonus. Certain employees may also be eligible to receive a fixed, permanent, pre-determined, non-discretionary, non-revocable and transparent to staff role-based allowance, structured in accordance with the European Banking Authority's fixed-pay definition criteria.
- ii. Variable remuneration individual award recommendations are developed by line managers in conjunction with the employee performance appraisal process and reflect individual achievements in respect of financial and non-financial goals, based on performances and risk cycles reflecting the underlying business performed, including the achievement of fair customer outcomes and adherence to risk and control policies. Risk and control hurdle attestations are required before performance can be confirmed as satisfactory. Variable remuneration criteria reflect for at least 50% qualitative targets in addition to quantitative measures linked to the Group, the Company and the individual. The framework and broad policy of individual awards are approved by the BMO Asset Management (Holdings) plc Risk & Remuneration Committee in accordance with the character and activities of the Company, while individual awards are subject to Board approval. The quantum of variable remuneration is reviewed and approved annually via the governance process of the Group and wider BMO Financial Group remuneration committees. The BMO Human Resources Committee makes a qualitative assessment of financial and non-financial measures, including risk (adjustments), market and regulatory factors, in approving the appropriate quantum of variable remuneration.

Source: BMO Global Asset Management as at 31.10.2021.

iii. Variable remuneration to be awarded or paid out will be reduced or fully claimed back (up to 100%) in cases of serious issues with employee competence, the employee demonstrating inappropriate behaviour or if the performance of the Company is poor or negative, including but not limited to the strength of the regulatory capital base, a failure of risk management, the discovery of fraudulent or misleading information in respect of the achievement of the underlying performance conditions relating to the bonus or the circumstances under which the bonus was awarded. Specific criteria exist for reduction or clawback in case of inappropriate behaviour of an employee.

iv. The award of variable remuneration is wholly discretionary and is not pre-determined by any contractual or formulaic entitlement. As such, and in line with the principle that employees are rewarded for their performance rather than for failure, the Company's remuneration policy does not allow guaranteed variable remuneration apart from specific cases related to recruitment of new employees during the first year of employment provided that the Company has sufficient own funds and a solid solvency ratio.

v. Retention variable remuneration awards may be necessary under exceptional circumstances for selected employees in order to reduce the risk of loss to a competitor and/or to enhance retention. Any such awards will only be made in exceptional circumstances, for example reorganisation, transfer of employment, or the retention of a key staff member whose loss would represent a material commercial risk.

vi. Variable remuneration may be awarded in a combination of cash and deferred share-based payment awards. Employees with greater functional, client/commercial and risk accountabilities receive a greater proportion of variable incentives in deferred share awards to reinforce their alignment to the long-term interests of clients and shareholders.

Source: BMO Global Asset Management as at 31.10.2021.

vii. Collectively on an annual basis, the Company's Human Resources, Risk, and Compliance functions identify employees whose roles have a material impact on the risk profile of the Company as per the European Securities and Markets Authority (for AIFMD and UCITS) and European Banking Authority (for CRD) published identification criteria. The listing of identified staff is reviewed and approved by the Group Risk & Remuneration Committee on an annual basis and identified employees are made aware of their identified staff status and obligations and impacts. Remuneration practices are applied to identified staff consistent with Wbfo criteria, in a way and to the extent that is appropriate to the Company's size, internal organisation and the nature, scale and complexity of the Company's activities.

viii. No redundancy awards were paid in the year to 31 October 2021. The Company ensures that any retention fees and redundancy/severance awards are calculated and delivered in accordance with Wbfo requirements.

Financial Remuneration Information

One Distribution employee received total remuneration above €1 million in the years ended 31 October 2021 and 31 October 2020.

The total amount of variable remuneration paid to 58 employees in the year ended 31 October 2021 was €2,940,000 (2020: €3,144,000 paid to 60 employees) and is split as follows:

Remuneration for the financial year		
	2021	2020
	€000	€000
Discretionary variable remuneration in cash	1,996	1,709
Pre-2021 deferred share-based awards vesting during the year	944	1,435

Source: BMO Global Asset Management as at 31.10.2021.

Socially Responsible Entrepreneurship

The Company and the Group are committed to maintaining the highest standards of governance and corporate citizenship and to pursuing growth in a responsible and sustainable manner. Our sustainability principles are an integral part of our strategic priorities and represent the inextricable connection between financial performance and corporate responsibility. The Company monitors its impact on the climate and tries to reduce it in a number of areas including reduction of waste, utilities and emissions.

Source: BMO Global Asset Management as at 31.10.2021.

Governance

In line with article 48 requirements to disclose information regarding internal governance arrangements the Company can confirm that the members of the management body held the following Directorships:

Director	Internal Appointments	External Appointments
Mr M. de Vreede	1	-
Mr D. Logan	17	4
Mr R. van Harten	2	-
Mr R. Watts	33	-
Mr B. Kuijpers	1	1

Mutual respect and diversity are encouraged within the Company, which is reflected in the HR policies. The Company will seek to employ the best person for each job and does not discriminate on grounds of gender, race, ethnicity, religion, sexual orientation, age or physical disability.

Pre-employment screening procedures are in place for all new recruits and all client facing employees are registered with the Dutch Securities Institute (DSI) in the Netherlands.

While part of the BMO Financial Group, the Company supported the creation of a diverse and inclusive workplace, promoting greater gender balance and diversity as a strategic business advantage.

The Company, as part of the broader BMO GAM business in EMEA (Europe, the Middle East and Africa), was acquired by Ameriprise Financial, Inc. (Ameriprise) on 8 November 2021, becoming part of Columbia Threadneedle Investments (CTI). CTI also regards increasing inclusivity and diversity throughout its employee population as a strategic imperative. The firm has set an objective to change the profile of its employee base over time to better reflect its client base and the broader population by increasing the percentage of women, Black, ethnic and all under-represented groups across every level of the organisation. Its proactive diversity and inclusion strategy is based on recruitment, development and leadership, governance and accountability and advocacy.

Capital resources

As a result of the accounting reference date of the Company being 31 October and the IFR requirement to report capital adequacy on a calendar quarter basis, the capital resources disclosures are based on the Company's position as set out in the Special Purpose Financial Report as at 30 September 2021.

The Company's regulatory capital consists entirely of Common Equity Tier 1 (CET1) capital, the highest-ranking form of Tier 1 capital. CET1 capital includes issued share capital, share premium, being the value of share capital issued in excess of par value, retained profits, accumulated other comprehensive income and other reserves.

Regulatory deductions to CET1 capital includes intangible assets and deferred tax assets that rely on future profitability and arises from temporary differences.

In compliance with the requirement in Part Six of the IFR to publish a prescribed set of templates analysing the Company's own funds, Appendix 1 is the Composition of Regulatory Own Funds, Appendix 2 is the Reconciliation of Regulatory Own Funds to Balance Sheet in the Audited Financial Statements and Appendix 3 is the Main Features of Own Fund Instruments Issued by the Firm.

Own Funds as at September 2021	
	€000
Common Equity Tier 1 capital: Instruments and reserves	
Fully paid up capital instruments	208
Share Premium	112,927
Retained earnings	38,332
Accumulated other comprehensive income	15
Other reserves	(120,578)
Common Equity Tier 1 capital before regulatory deductions	30,904
CET1 capital: regulatory deductions	
Intangible assets	(226)
Deferred tax assets that rely on future profitability	(2,108)
Total regulatory deductions	(2,334)
Common Equity Tier 1 capital	28,570
Additional Tier 1 capital	0
Tier 1 Capital	28,570
Tier 2 Capital	0
Own Funds	28,570

Source: BMO Global Asset Management as at 31.10.2021.

Capital resource requirements

The Company's Pillar 1 capital requirement is calculated as the higher of: (a) Permanent minimum capital requirement of €150,000; (b) total K-Factor requirement; and (c) the fixed overheads requirement.

Currently, the Company's Fixed Overhead Requirement of €14,929,000 establishes its Pillar 1 capital requirement, being higher than the base capital requirement and the total K-Factor requirement.

Own fund requirements as at September 2021	
	€000
Permanent minimum capital requirement	150
Risk to client	5,675
Risk to market	0
Risk to firm	0
Total K-Factor requirement	5,675
Fixed overhead requirement	14,929
Own fund requirement	14,929

Source: BMO Global Asset Management as at 31.10.2021.

Compliance with the Pillar 2 rule requirements

The adequacy of capital to support current and future activities is monitored in the Internal Capital and Liquidity Adequacy Assessment Process (“ICLAAP”). The objective of this process is to ensure that firms have adequate capital and liquidity to enable them to manage risks not deemed to be adequately covered under the Pillar 1 minimum requirements. This is a forward-looking exercise with the level of capital required by the Company being assessed through reviewing a number of scenarios, as determined by the Company’s Board, and comparing them with the base case scenario of our budgeted business plan. This approach identifies the timescale and extent of possible capital and liquidity deficiencies should an adverse scenario arise. The additional level of capital and liquidity required to cover the Company against such a scenario can then be assessed and / or the mitigating actions identified which are required to ensure a continued capital and liquidity surplus.

The ICLAAP is updated and formally reviewed, challenged and approved by the Company’s Board on an annual basis, or more frequently if fundamental changes to the business require it.

Verification, frequency and ongoing review of the disclosures

The disclosures detailed in this document are updated in conjunction with the ICLAAP, and generally on an annual basis, unless there is a significant event which would detrimentally impact the capital, liquidity and risk position of the Company.
