Risk and Rewards Profile

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- It may be difficult or impossible to realise assets of the Fund because the underlying property may not be readily saleable.
- The value of a property is a matter of a valuer's opinion and the true value may not be recognised until the property is sold. Should material uncertainty apply to the value of properties that constitute more than 20% of the scheme property, it may be necessary to temporarily suspend dealing.
- If values in the property market go down or rental income decreases, the Fund's value may be negatively affected.
- Due to the illiquid nature of property and the time it can take to buy or sell assets, under normal circumstances between 15-25% of the Fund may be held in cash deposits. High levels of cash may also be held by the Fund in anticipation of unusually large redemption requests, or if property investment opportunities are limited. Holding high levels of cash has an impact on the performance of the Fund and its distributable income until it is invested in property assets. If a significant number of shareholders withdraw their investment at the same time, the fund manager may consider it necessary to dispose of property investments to generate additional cash. In difficult market conditions, it can take longer to sell properties, and some properties may be sold for less than expected. The right to redeem shares in the fund will be suspended if there is insufficient cash available to satisfy sale requests, or could become necessary to balance the interests of continuing shareholders with those seeking to redeem.
- As the Fund is dual priced, there is a price to buy units and a lower price to sell them. The difference between the two is known as the 'spread'. This Fund's spread reflects the transaction costs of buying and selling commercial property, and other assets. The spread can change at any time and by any amount. The Spread for this Fund is likely to be larger than for funds investing in assets other than commercial property. Consequently, there is a higher possibility of an investment being worth less than when invested, especially in the early years.
- The risks currently identified as being applicable to the Fund are set out in the "Risk Factors" section of the Prospectus.

Objectives and Investment Policy

The aim of the Fund is to provide income and to grow the amount you invested.

The Fund is a Property Authorised Investment Fund ("PAIF") for tax purposes.

The Fund will invest at least two-thirds of its assets in commercial real estate (property used for business purposes) in the United Kingdom. The Fund may also invest in shares, bonds, gilts, and other funds. The Fund may invest in other assets including cash to efficiently manage the Fund.

Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.

You can buy and sell shares in the Fund on any day that is a business day in London. You can find more detail on the objective and investment policy of the Fund in the "Investment Objective, Policy and other Details of the Company" section of the Prospectus.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw within 5 years.

*Past performance is not a guide to future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. All returns assume income is reinvested for a local taxpayer, bid to bid performance (which means performance does not include the effect of any initial charges).
