PYRFORD GLOBAL TOTAL RETURN (STERLING) (THE "FUND")

Class A Accumulation Shares (GBP) IE00B1XBN520, a sub-fund of Columbia Threadneedle (Irl) PLC (the "Company"), regulated by the Central Bank of Ireland.

This Fund is managed by Waystone Management Company (IE) Limited (the "Manager").

Objectives and Investment Policy

- The Fund aims to provide a stable stream of returns that beats the rate of inflation over the long term while at the same time minimising volatility and aiming to protect investors from losses as compared to the market. The Fund is actively managed and aims to achieve a return similar to or better than the UK Retail Price Index (RPI) (the "Benchmark"). The Fund is not constrained by this Benchmark. The Fund invests in high quality fixed interest debt issued by governments and equities (shares) of companies that, at the time of purchase, have a minimum stock market worth of US \$500 million. The Fund can invest worldwide, however it places particular emphasis on North America, Europe (including the UK) and the Asia Pacific Region (including Japan). The Fund will have significant exposure to pound sterling-denominated assets.
- The Fund may invest up to 20% of its assets in the global emerging markets and up to 25% of its assets in cash. Forward foreign exchange transactions may be used to reduce the risk of adverse market changes in exchange rates.
- For temporary defensive purposes, the Fund may invest, without limitation, in money market instruments. The Fund may invest in other types of eligible investments, as disclosed in the prospectus for the Fund.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money in the short term.
- Income from investments in the Fund will be added to the value of your shares.
- You may sell your shares on any day on which banks in Dublin and London are open for business by submitting an application to the administrator, State Street Fund Services (Ireland) Limited, by 11:00 a.m. (Irish time) on such day.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk,
Typically lower rewards

Higher Risk,
Typically higher rewards

- The Fund is rated 4 because historically it has shown a medium level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- Credit risk: the issuer of a debt security may not be able to repay the full amount due on the maturity date, or the change in the price of a bond may be significant because of changes in interest rates or other market factors and this may reduce the value of your investment.
- Emerging markets risk: securities in emerging markets may involve a higher degree of risk because these markets may be more unstable than developed markets due to regulatory, political, economic and social factors.
- Currency risk: investing in assets denominated in a currency other than the share class currency exposes the value of the investment to exchange rate fluctuations.
- Operational risk: management, business or administration processes, including those to do with the safekeeping of assets, may fail, leading to losses.
- Derivatives risk: where derivatives are used to obtain, increase or reduce exposure to fixed interest debt, equities (shares) or an index, these derivatives may have an impact on the fund's risk profile.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.
