What is this product?

Type

This product is an investment fund.

Term

There is no maturity date applicable to this product.

All of the Shares may be redeemed by the Company with the sanction of a special resolution of Shareholders, on no less than three weeks' notice to Shareholders at a sum equal to the Net Asset Value per Share.

In addition, the Company may, on no less than three weeks' notice to Shareholders, redeem all Shares issued if: (i) the Company is no longer authorised by the Central Bank as an investment company pursuant to Part 24 of the Companies Act 2014; or (ii) any law that has been passed renders it illegal or, in the reasonable opinion of the Directors of the Company, impracticable or inadvisable to continue the Company; or (iii) at any time following the Initial Offer Period, the Net Asset Value of the Company, any one Class or any one Fund shall on any Dealing Day within a period of one week is less than EUR75 million (or its currency equivalent), provided that notice of not less than four and not more than six weeks has been given to the Shareholders within four weeks of such period.

Objectives

The Fund aims to provide a stable stream of returns that beats the rate of inflation over the long term while at the same time minimising volatility and aiming to protect investors from losses as compared to the market. The Fund is actively managed and aims to achieve a return similar to or better than the UK Retail Price Index (RPI) (the "Benchmark"). The Fund is not constrained by this Benchmark. The Fund invests in high quality fixed interest debt issued by governments and equities (shares) of companies that, at the time of purchase, have a minimum stock market worth of US\$500 million. The Fund can invest worldwide, however it places particular emphasis on North America, Europe (including the UK) and the Asia Pacific Region (including Japan). The Fund will have significant exposure to pound sterling-denominated assets.

The Fund may invest up to 20% of its assets in the global emerging markets and up to 25% of its assets in cash.

Forward foreign exchange transactions may be used to reduce the risk of adverse market changes in exchange rates.

For temporary defensive purposes, the Fund may invest, without limitation, in money market instruments.

The Fund may invest in other types of eligible investments, as disclosed in the prospectus for the Fund.

The Fund is actively managed. The majority of issuers in the Fund are likely to be represented in the benchmark because the Investment Manager uses it as a basis for portfolio construction, but has some discretion to deviate from its composition and risk characteristics within indicative risk parameters. The Fund will resemble the composition and risk characteristics of its benchmark; however, the Investment Manager's discretion may result in performance that differs from the benchmark.

Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Income from investments in the Fund will be added to the value of your shares.

You can find more details on the Investment Objective and policy of the Fund in the Prospectus. For more information on investment terms used in this document, please see Prospectus and Glossary available at www.columbiathreadneedle.com.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for 3 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the value of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment in the product, and/or reference benchmark between 03/2017 to 03/2020

Moderate scenario: This type of scenario occurred for an investment in the product, and/or reference benchmark between 11/2018 to 11/2021

Favourable scenario: This type of scenario occurred for an investment in the product, and/or reference benchmark between 02/2023 to 02/2026

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company of the Fund has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	82 GBP	272 GBP
Annual Cost Impact*	0.82%	0.85%

(*)This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 3.86% before costs and 3.01% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you.
