What is this product?

Type

This product is an investment fund.

Term

There is no maturity date applicable to this product.

All of the Shares may be redeemed by the Company with the sanction of a special resolution of Shareholders, on no less than three weeks' notice to Shareholders at a sum equal to the Net Asset Value per Share.

In addition, the Company may, on no less than three weeks' notice to Shareholders, redeem all Shares issued if: (i) the Company is no longer authorised by the Central Bank as an investment company pursuant to Part 24 of the Companies Act 2014; or (ii) any law that has been passed renders it illegal or, in the reasonable opinion of the Directors of the Company, impracticable or inadvisable to continue the Company; or (iii) at any time following the Initial Offer Period, the Net Asset Value of the Company, any one Class or any one Fund shall on any Dealing Day within a period of one week is less than EUR75 million (or its currency equivalent), provided that notice of not less than four and not more than six weeks has been given to the Shareholders within four weeks of such period.

Objectives

Investment objective The fund aims to provide a stable stream of returns over the long term while at the same time minimising volatility and aiming to protect investors from losses as compared to the MSCI All Country World IndexSM. The fund is actively managed and uses the MSCI All Country World Index (the "Benchmark") for performance comparison purposes. The Benchmark is an index designed to measure the equity market performance of developed and emerging markets. The fund is not constrained by this Benchmark and has significant freedom to invest in a portfolio that is different to the Benchmark's own composition. The fund will invest in equities (shares) of companies that, at the time of purchase, have a minimum market worth of US\$300 million. The fund can invest anywhere in the world. The fund is diversified across countries (minimum of 6), companies (minimum of 60) and sectors (minimum of 5).

Investment policies The fund may invest up to 20% of its assets in the emerging markets.

Forward foreign exchange transactions may be used to reduce the risk of adverse market changes in exchange rates.

For temporary defensive purposes, the fund may invest, without limitation, in money market instruments.

The fund may invest in other types of eligible investments, as disclosed in the prospectus for the fund.

Share Class Benchmark MSCI All Country World Index

Benchmark uses The Fund is actively managed. The majority of issuers in the Fund are likely to be represented in the benchmark because the Investment Manager uses it as a basis for portfolio construction, but has some discretion to deviate from its composition and risk characteristics within indicative risk parameters. The Fund will resemble the composition and risk characteristics of its benchmark; however, the Investment Manager's discretion may result in performance that differs from the benchmark.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This share class pays a dividend to you twice per year, on 30 June and 31 December or as may be otherwise determined.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 3 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Practical information

Depository The fund depository is State Street Custodial Services (Ireland) Limited.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of Waystone International Ltd to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.pyrford.co.uk.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between March 2022 and October 2023.

Moderate: this type of scenario occurred for an investment between May 2016 and May 2019.

Favourable: this type of scenario occurred for an investment between March 2020 and March 2023.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company of the Fund has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10000 USD is invested.

Example Investment \$ 10,000	If you exit after 1 year	If you exit after 3 years (recommended holding period)
Total Costs	\$ 146	\$ 439
Annual cost impact*	1.5%	1.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.2% before costs and 6.6% after costs.
