

PUBLIC TRANSPARENCY REPORT

2024

Columbia Threadneedle Investments

Generated 25-11-2024

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2024 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented. The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

At Columbia Threadneedle Investments, we strive to be a trusted partner to our clients and a responsible steward of their assets, allocating capital within a framework of robust research and good governance. We have a wealth of resource supporting Responsible Investment (RI) activities across the firm, including a dedicated RI team within the investment department that acts as a global center of excellence on financially material ESG issues. Our RI capability helps us to assess future investment risk, unlock potential new investment opportunities, and fulfil our clients' long-term financial objectives. We engage in RI:

1.

To enhance our research intensity: As part of our independent research, we believe the consideration of all financially material factors, including ESG factors, provides a more comprehensive and holistic understanding of the risks and opportunities associated with the investments we make on behalf of our clients. Therefore, ESG factors are evaluated, alongside other potentially relevant financially material factors, when undertaking our investment research. Our analysts consider ESG risks (such as operational standards, management of stakeholder risk, or climate vulnerabilities) and opportunities (potential drivers of growth and competitive advantages arising from the energy transition) to build a comprehensive picture of an issuer. We have developed sophisticated ESG tools and analytics to support investment teams when considering ESG factors and with portfolio monitoring.

2. To serve our clients: Our approach to RI – just like our clients and many of the issues that confront them – is truly global. We have the flexibility to tailor products and strategies to meet the different needs and investment goals of our investors and the regulatory environments in which we and they operate.

3. To fulfil our role as responsible stewards of capital: we believe well managed companies are better positioned to manage the risks and challenges inherent in business and capture opportunities that foster sustainability and long-term value creation.

As active investors, we engage with investee companies for insight into how they manage financially material risks and opportunities and, where appropriate, encourage improvements in their ESG practices with the aim of seeking to enhance shareholder value.

4. In our role as a responsible business: we aim to deliver positive outcomes that meet the needs of our stakeholders – clients, employees, communities, shareholders and as a capital market participant. We commit to always act with responsibility, with transparency and in the best interests of those who trust us to manage their investments.

Positioned within the investment department, our dedicated RI team supports our investment professionals, the wider business and, ultimately, our clients.

By combining deep insights, alongside diversity of expertise across Investments, we have created a powerful RI capability to help support the investment decisions we make and the products we develop to meet a range of client demands across asset classes. We believe that investing responsibly is fundamental to long-term wealth creation because it can enhance how we find value and mitigate risks.

We use considered engagement and thoughtful proxy voting to understand financially material risks with issuers, and better understand and influence corporate behavior, which we believe helps to enhance long-term investment performance. Investors rely on us to invest prudently to achieve the investment outcomes they expect, and some investors also look for us to be proactive for them in creating a more sustainable future.

The information in this submission relates to Columbia Threadneedle Investments and all data is as of Dec. 31, 2023. References to “we” and “our” in this report refer only to Columbia Threadneedle. Information contained in this report is intended to be responsive to the PRI questions and should not be construed as a characterization regarding the materiality or financial impact of that information to Columbia Threadneedle, or any of its affiliates, or Ameriprise Financial, Inc., as individual entities or collectively as a whole.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Below we highlight examples of how we developed our RI capabilities during 2023, across initiatives; research, data, and reporting; and client-focused activities.

- After launching our global active ownership policies in January 2023, much of the year was focused on implementing these and providing relevant training sessions for RI analysts, research analysts and portfolio managers. This included delivering over 30 investment desk presentations and thematic roundtables on topics such as human capital, energy transition, chemicals and obesity and their relevance to the investment decision making process.

- We continued to advance our data and analytics capabilities to support the consideration of financially material ESG factors in the management of client assets, launching seven new ESG tools on our global investment platform (Aladdin).

These included:

- o Completing work on our net zero tool, based on our net zero methodology. Work continues to expand coverage of investments under the methodology and developing methodologies for asset classes such as sovereign bonds.

- o Developed a bespoke tool to appraise the quality and consistency of deforestation management of issuers involved in soft commodity value chains. We are enhancing this tool to expand the remit to cover corporate management of all nature impacts and risks, and plan to launch this tool in 2024.

- o Refined our SDG mapping tool and increased its applicability to portfolios. We updated our methodology, provided training sessions to investment teams, and updated a client-focused whitepaper about our SDG mapping approach.

- We focused on reporting outputs dedicated to meeting regulatory requirements such as stewardship codes and the EU's SFDR regulation, as well as sustainability labels such as Febelfin (BeNELux) or FNG (Germany, Austria, Switzerland, and Lichtenstein) for certain funds.

- We reviewed our participation in membership organizations, collaborative engagements, corporate commitments, and public statements to ensure that such activities help support our focus on delivering clients' desired investment outcomes.

For example, we participated in the FRC's UK Corporate Governance Code consultation, and joined the 30% Club Germany, Mining2030 and the Data Convergence Initiative.

- We continued to deliver for clients by enhancing our EMEA product range and undertaking client engagement and education sessions:

- o Three product launches in EMEA: our Sustainable Global Equity Income, Sustainable Global Equity Enhanced Income, and Global Social Bond strategies.

- o Hosted our Responsible Investment Conference in London, attended by UK and European clients.

The agenda included a panel of internal and external experts on social issues; hearing directly from our investee companies Smurfit Kappa and Marks & Spencer about their RI journeys and perspectives on investor engagement; and biodiversity.

- o Expanded our presence in APAC, moving one RI product specialist to Singapore to better meet demand and interact with clients in this region. We also achieved signatory status to the Japan and Taiwan stewardship codes for the first time. In 2024 we are also applying to be a signatory to the Korea stewardship code.

- o Sponsored and presented at the PRI in-person conference in Tokyo, while also conducting face-to-face client meetings while in the region.

- o Delivered 13 ESG Viewpoints and 12 impact reports to highlight to clients our research and engagement on material ESG issues, as well as the ESG performance of certain funds.

- o Spoke at over 30 conferences on RI to share our knowledge with clients and expand our presence. This included a presentation on El Niño and weather-related risks with more than 700 US clients and prospects registered.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Responsible Investment is a key priority of our global business, and we are investing meaningfully across business functions to ensure it is supported within our operations. Some of the steps we will plan to take to continue the momentum in progress include:

- Continuing to develop our client reporting capability to enable increased transparency with our clients. Reporting is an evolving area, shaped by increasing client expectations and the developing regulatory landscape. During 2023, we undertook extensive work to integrate and enhance our RI reporting offering, with the first enhanced reports delivered to clients in Q1 2024.

Transparency through our reporting remains a priority for the organization into 2024 and beyond.

- We continue to apply our net zero methodology across our portfolios in Europe, working in partnership with, and under the direction of, our clients, and plan to expand methodologies into asset classes not currently covered, such as sovereign bonds.

- Continue to embed consideration of financially material ESG factors across our investment process and more systematic collaboration between our dedicated RI team with fundamental research analysts.

We will continue to invest in our tools and data to enable ESG integration. For example, we are currently piloting a biodiversity tool, which will enable us to systematically analyze companies' risk management and adaptation practices around nature.

- Finally, we continue to launch new strategies in EMEA to meet client demand that leverage our expertise in responsible investment across traditional and alternative asset classes. Our product pipeline reflects the variety of priorities and differing needs of our global client base.

Does your organisation have governance processes or structures to ensure that your overall political engagement is aligned with your commitment to the principles of PRI, including any political engagement conducted by third parties on your behalf?

☒ (A) Yes

Describe how you do this:

As a global asset manager, Columbia Threadneedle participates in a number of organisations, including certain regional organisations that play a role in policy engagement. In addition, our firm participates as a member of a number of organisations that engage with policymakers and regulators as part of our Responsible Investment initiatives. The Head of Active Ownership manages the approval process for RI policy engagement. For the approval process to begin, there must be thematic alignment between relevant portfolio managers or analysts. Once aligned, requests are reviewed by Legal and Compliance Communications within both Columbia Threadneedle and our parent organisation Ameriprise Financial, Inc. Requests are then reviewed at monthly meetings involving the Global Heads of Responsible Investment, Research, Equities and Fixed Income, as well as the Ameriprise Corporate Social Responsibility Governance and Strategy Group Chair. Final sign-off is obtained from the global or regional CEO, depending on the nature of the request. Any approval process participant can ask for further escalation/additional approval participants/steps beyond the described process. Participation in these organisations comes with the understanding that we may not always align with all of their positions or those of their other members. With respect to organisations which we participate, these engagements, initiatives, memberships or public statements are published in our annual Stewardship Report.

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

● (A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Our strategy is set out in our June 2024 TCFD report, which provides an analysis of the range of risks and opportunities which may affect our business, including transition risks relating to policy and regulation, technology, market risk and reputation; and physical risks and opportunities relating both to operations and investments. The report also identifies the mitigation risks and actions taken to maximise opportunities. In relation to our investment strategy, as a research-driven active manager, we believe that the integration of financially material ESG considerations into our investment research builds a fuller picture of the risks and opportunities and future return prospects of the companies, debt issuers and assets we invest, or look to invest in. While our investment approaches and styles vary depending on the product and strategy, our investment professionals share a common belief that companies that demonstrate a sustainable business model, organisational stability, and the ability to evolve where necessary are best placed to deliver long-term value for our clients, support economic growth, and serve broader prosperity.

ESG factors are therefore integrated into our fundamental research process, led by a team of approximately 200 analysts and research associates. The integration of financially material ESG factors, including climate-related risk and opportunities, is available to our investment teams as part of their decision making, as appropriate. Information is tailored by asset class and product type, as set out in our full TCFD report for key asset classes. In equities and corporate debt, which together make up the majority of our assets, tools are made available to our investment teams through Aladdin Enterprise System (our portfolio management system). They include TCFD carbon metrics and our proprietary Net Zero tool, based on the Net Zero Investment Framework, which rates companies from Aligned, through Aligning or Committed, to Not Aligned.

Additionally, we offer investment solutions that allow investors, if they wish, to place extra emphasis on managing climate risks and opportunities in their portfolios. Examples of our current EMEA strategies include our Responsible and sustainable equity and fixed income strategies; social and green bonds; and Responsible Engagement Overlay (reo®) engagement and voting service.

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

☒ **(A) Yes, we have a process to identify and assess climate-related risks**

(1) Describe your process

The future path of global temperature is uncertain. Transition risk and physical risks can be seen as potentially offsetting each other – earlier and more vigorous government action could increase transition risk but decrease physical risk. This uncertainty leads us to the use of climate scenario analysis to understand the different sensitivities of our investment holdings and portfolios to these various options as we remain focused on delivering long-term economic value for our clients. One of the scenario analysis tools we use for listed equity and debt portfolios is Climate Value at Risk. Our Investment Risk team analyses climate value at risk data for client portfolios and benchmarks where the data is available, for equities and corporate fixed income. The data provides a relative guide on the potential upside or downside impact to a portfolio from climate risks, under a variety of climate scenarios. The scenarios are based on the Network for Greening the Financial System (NGFS) public scenarios and are modelled using the REMIND model. In other asset classes, we use approaches to assess risk specific to the asset class and investment strategy. In our European direct real estate businesses, our standard due diligence protocol when considering investments involves the detailed consideration of a wide range of ESG factors. We specifically focus on investment-critical aspects such as energy efficiency characteristics, flood risk, longer-term resilience to climate change and impact on net zero carbon ambitions, as appropriate to each individual property. In private equity the exposure to climate-related risks and opportunities is assessed as part of our ESG due diligence.

(2) Describe how this process is integrated into your overall risk management

Our independent Investment Risk team, part of the second line of defence, monitors portfolios daily against a number of risk-based guidelines. We do not prioritise between climate-related risks and the other types of risks we consider (e.g., market, liquidity, credit). In our view risks should be monitored holistically. The levels of our risk guidelines are informed by the risk and return preferences and targets of our clients and their portfolios, as well as each portfolio's level of ESG integration (funds will have different levels of ESG integration within their investment portfolio depending on how they are categorised internally in alignment with applicable regulatory requirements, how portfolio managers have determined to evaluate such risks consistent with the requirements of client mandates, and any applicable regulatory labelling or disclosure regime that they must comply with). This helps to consider how to prioritise climate-related risks overall. The compliance team also monitors portfolios for compliance with client directed investment limits.

☒ **(B) Yes, we have a process to manage climate-related risks**

(1) Describe your process

Our investment risk teams compare scenario analysis results across the portfolios we run to identify portfolios with potentially higher negative exposure to climate related risks.

Our Investment Risk team reviewing these results would firstly view the portfolios where the risk adjusted figures were significantly negative, and then calculate which individual underlying names in a particular portfolio were large drivers of the negative relative performance. The team would discuss these names with both the portfolio managers and the RI team to see if any action is required. A potential outcome of this could be to engage with these companies to encourage them to reduce their carbon emissions.

(2) Describe how this process is integrated into your overall risk management

If a portfolio breaches a climate related guideline or a limit, this will cause an investment risk analyst to look at the cause of the breach and, if needed, discuss it with the portfolio manager. If the Investment Risk team is not satisfied with the outcome of the discussion and any actions taken by the portfolio manager there is a well-defined escalation route – to the desk head, the asset class head and then the CIO (or Head of Alternatives). In an extreme case any escalation could be taken to the relevant fund board.

Our Annual ESG Co-investment survey is sent to all of our investee GPs and management teams. This is a formal engagement tool that assesses ESG competence at both the GP and company-level and assigns an ESG rating based on a proprietary scoring system. This process is repeated annually with development measured and published within our Annual Private Equity ESG Report. As an LP, we influence our GPs / underlying investments to further develop their ESG competence over the life of our investment.
