"We seek companies with a competitive advantage, strong cash flow generation and the ability to maintain pricing. By taking a global approach, we are not restricted by increasingly artificial regional boundaries and can invest in truly the best companies across the globe."

- David Dudding

INVESTMENT APPROACH

The ability of quality companies to sustain high returns on capital and above-average growth is often underestimated, meaning that potential long-term winners trade at a discount to their intrinsic value. We search for quality stocks which have durable competitive advantages alongside robust business models, and therefore strong and sustainable long-term growth potential. The global equities team thoroughly analyses both company fundamentals and industry prospects. We use a research framework to identify the source and durability of companies' with ESG analysis central to this approach.

We work closely with our regional equity teams, global central research and responsible investment teams across the globe to build a high conviction, best ideas portfolio of some of the world's best quality companies. We are not simply looking for companies with the highest returns, but also ones where they are either stable or improving and are sustainable. As we take a 'go anywhere' approach, stock selection drives sector and regional weightings, and we believe our focus on businesses with strong fundamentals drives outperformance across a range of market conditions.

KEY RISKS

Past performance is not a guide to future returns and the fund may not achieve its investment objective.

Your capital is at risk.

The value of investments can fall as well as rise and investors might not get back the sum originally invested.

Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.

The investment policy of the fund allows it to invest in derivatives for the purposes of reducing risk or minimising the cost of transactions.

The fund may exhibit significant price volatility.

The fund has a concentrated portfolio (holds a limited number of investments and/or has a restricted investment universe) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the fund's value.

All the risks currently identified as being applicable to the Fund are set out in the "Risk Factors" section of the Prospectus.

Please read the Key Investor Information Document and the Fund Prospectus if considering investing.
