Quick facts

Management Company:	Threadneedle Management Luxembourg S.A.		
Sub-Advisor:	Threadneedle Asset Management Limited (internal delegation, UK)		
Sub-Advisor's Delegate:	Columbia Management Investment Advisers, LLC (internal delegation, US)		
Depository:	Citibank Europe plc, Luxembourg Branch		
Ongoing charges over a year[#]:	Share Classes AEC, AEH, AKH, ANH, ASC, ASH, AU and AUP :	1.60%	
Dealing frequency:	Daily		
Base currency:	US\$		
Dividend policy:	For Share Classes AUP, AEC and ASC:	Dividend, if declared, will be distributed. Distributions may at the discretion of the Directors be paid out of capital or effectively out of capital (i.e. paying dividends out of gross income while charging all or part of their fees and expenses out of capital) of the share classes. Any such distributions may result in an immediate reduction of the net asset value per share.	
	For Share Classes AKH, ANH, AU, AEH and ASH:	No dividend distribution (Income, if any, will be re-invested)	
Financial year end of this Portfolio:	31 March		
Minimum investment:	Initial:	Share Classes AU and AUP:	USD 2,500
	Additional:	Nil	
	Initial:	Share Classes AEC and AEH:	EUR 2,500
	Additional:	Nil	
	Initial:	Share Class ASC and ASH:	SGD 2,500
	Additional:	Nil	
	Initial:	Share Class AKH:	SEK 20,000
	Additional:	Nil	
	Initial:	Share Class ANH:	NOK 20,000
	Additional:	Nil	

[#] The ongoing charges figure is fixed based on the annual rates of asset management fee and operating expenses and is expressed as a percentage of the net asset value of the share class.

What is this product?

Threadneedle (Lux) – Global Emerging Market Short-Term Bonds (the “Portfolio”) is a portfolio of Threadneedle (Lux), an investment company (i.e. a mutual fund) with variable capital constituted in Luxembourg. The home regulator of Threadneedle (Lux) is the Commission de Surveillance du Secteur Financier in Luxembourg.

Objective and Investment Strategy

The Portfolio is actively managed and seeks to achieve total return from income and capital appreciation by investing at least two-thirds of its net asset value in a globally diversified range of transferable debt securities. Such securities will be issued or guaranteed by supranational entities, or governments, financial institutions or corporations in emerging market countries. The Portfolio may also invest up to one-third of its net asset value in debt securities issued or guaranteed by G-7 governments or supranational entities and in credit linked notes.

The Portfolio may invest in securities denominated in various currencies and will generally hedge non-U.S. Dollar exposures. However, the maximum amount of non-U.S. Dollar exposure remaining unhedged will not exceed 35% of the net assets of the Portfolio. At the same time, the maximum amount of non-U.S. Dollar exposure remaining unhedged in any one currency will not exceed 10% of the net assets of the Portfolio. The Portfolio will have an average duration of five years or less. Duration is the sensitivity of a bond to a change in interest rates. The longer the duration of a bond, the higher its sensitivity to interest rates will be.

Up to 10% of the Portfolio's net asset value may be invested in bonds traded on the China Interbank Bond Market using Bond Connect.

The Portfolio may use financial derivative instruments for investment purposes, as well as for hedging and efficient portfolio management. The derivatives which the Portfolio may use include, but are not limited to, foreign currency exchange contracts, interest rate swaps, interest rate futures and credit default swaps.

The Portfolio is actively managed in reference to the J.P. Morgan EMBI Global 3-5 Years Index. The index is broadly representative of the securities in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index.

Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index.

Use of derivatives/investment in derivatives

The Portfolio's net derivative exposure may be up to 50% of the Portfolio's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

Investment

There is no guarantee that the investment objective of the Portfolio can be achieved. The value of investments held by the Portfolio can fall as well as rise and investors might not get back the sum originally invested, especially if investments are not held for the long term.

Volatility

The prices of the Portfolio's investments may rise and fall sharply in the short-term and this may result in a higher volatility of the Portfolio's value.

Political and Financial

The Portfolio invests in markets where economic and regulatory risk can be significant. These factors can affect liquidity, settlement and asset values. Any such event can have a negative effect on the value of your investment.

Geographical Concentration

The Portfolio's investments are concentrated in emerging markets. This may result in higher volatility than funds which comprise broad-based global investments.

Downgrading of Debt Securities

Subsequent downgrade of the debt securities held by the Portfolio may adversely affect the value of such securities and may expose the Portfolio to higher credit and counterparty risks.

Currency

Where investments are made in assets that are denominated in multiple currencies, changes in exchange rates may affect the value of the investments.

Investor Currency

Where investments in the Portfolio are in currencies other than your own, changes in exchange rates may affect the value of your investments.

Issuer

The Portfolio invests in securities whose value would be significantly affected if the issuer either refused to pay or was unable to pay.

Threadneedle (Lux) – Global Emerging Market Short-Term Bonds

Below Investment Grade Debt Securities

The Portfolio may invest in high yield/below investment grade debt securities. This will mean the Portfolio is more likely to be exposed to higher volatility and liquidity risks.

Credit Linked Notes

The Portfolio may invest in credit linked notes. The price of credit linked notes will be affected by the performance of the underlying reference assets, which could be subject to a variety of different risks (dependent on the type of asset). Credit linked notes are also subject to other risks including counterparty credit risk and legal risk, which may mean that the value of the credit linked notes may vary significantly from the price of the underlying reference asset, and they may even go down in value if the underlying reference assets increase in value.

Liquidity

The Portfolio invests in assets that are not always readily saleable without suffering a discount to fair value. The Portfolio may have to significantly lower the selling price, sell other investments or forego another, more appealing investment opportunity.

Interest Rates

Changes in interest rates are likely to affect the Portfolio's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.

Inflation

Most bond funds offer limited capital growth potential and an income that is not linked to inflation. Therefore, inflation can affect the value of capital and income over time.

Derivatives

The Portfolio may invest in financial derivative instruments. Investing in these instruments may involve counterparty risks. If the counterparty defaults on such instruments this may affect the value of the Portfolio.

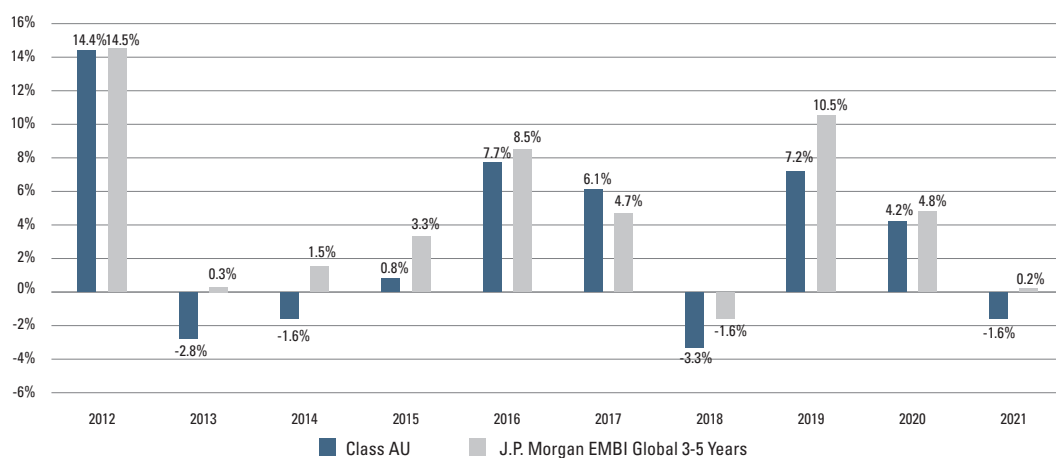

Hedge/Basis

The use of financial derivative instruments for hedging and/or efficient portfolio management/investment purposes may become ineffective in adverse situations or if the Management Company or the Sub-Advisor employs a strategy that does not correlate well with the Portfolio's investments. This may result in a significant loss to the Portfolio.

Distribution out of capital risk

Distributions may be paid out of the capital of the Share Classes AEC, ASC, and AUP if the net distributable income attributable to these share classes during the relevant period is insufficient to pay distributions as declared. The Directors of the Portfolio may also, at their discretion, pay dividends out of gross income while paying all or part of the share classes' expenses out of their capital, resulting in an increase in distributable income for the payment of dividends, and therefore paying dividends effectively out of capital of the relevant share classes. Investors should note that the payment of distributions out of capital, or effectively out of, represents a return or a withdrawal of part of the amount they originally invested or capital gain attributable to that amount. Any distributions involving payment of dividends out of, or effectively out of, capital of the share classes will result in an immediate decrease in the net asset value of the relevant shares.

How has the Portfolio performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the share class increased or decreased in value during the calendar year being shown. Performance data has been calculated in US\$ including ongoing charges and excluding subscription fee and redemption fee you might have to pay.

Threadneedle (Lux) – Global Emerging Market Short-Term Bonds

- Portfolio launch date: 31 August 2004.
- Share Class AU launch date: 31 August 2004.
- The Management Company views Share Class AU, being the retail share class denominated in the Portfolio's base currency, as the most appropriate representative share class.
- The benchmark of the Portfolio is J.P. Morgan EMBI Global 3-5 Years Index. Please refer to the offering document for further information relating to the benchmark.

Is there any guarantee?

This Portfolio does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Portfolio.

Fee	What you pay
Subscription Fee (Initial Sales Charge)	Share Classes AEC, AEH, AKH, ANH, ASC, ASH, AU, and AUP: Up to 3.00% of the amount invested
Switching Fee (Exchange Fee)	Up to 0.75% of the net asset value of the acquired shares
Redemption Fee	Not applicable

Ongoing fees payable by the Portfolio

The following expenses will be paid out of the Portfolio. They affect you because they reduce the return you get on your investments.

	Annual rate
Asset management fee	Share Classes AEC, AEH, AKH, ANH, ASC, ASH, AU and AUP: 1.30% of the class's value
Custodian fee	Included in Operating Expenses below
Performance fee	Not applicable
Administration fee	Included in Operating Expenses below
Operating Expenses	0.30% of the class's value

Other fees

You may have to pay other fees when dealing in the shares of the Portfolio.

Additional Information

- In respect of Share Class AEC, ASC and AUP, the composition of the distributions (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available by the Hong Kong Representative on request and also on the website www.columbiathreadneedle.com¹.
- You generally buy and redeem shares at the Portfolio's next-determined net asset value after the Registrar and Transfer Agent receives your request in good order on or before 3.00p.m. (Luxembourg time) on each valuation day being the dealing cut-off time. The Hong Kong Representative/your distributor may impose different deadlines for receiving requests from investors. Please check with your distributor regarding its internal dealing cut-off time.
- The net asset value of this Portfolio is calculated on each Luxembourg "business day" and the price of shares is published daily on the website www.columbiathreadneedle.com¹.
- You may obtain the past performance information of other share classes offered to Hong Kong investors from www.columbiathreadneedle.com¹.
