Capital Guaranteed	No	Expense Ratio for FY ended 31 March 2022	Class AEC, AEH, AU, AUP 1.64% to 1.65%

PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

■ The Portfolio is only suitable for investors who:

- seek capital appreciation in a globally asset-allocated portfolio;
- seek to add diversification to their investments through exposure to global equities, fixed income, cash, currencies and commodities;
- have a medium to high level of risk tolerance; and
- have a medium- to long-term investment time horizon.

You should consult your financial adviser if in doubt whether this product is suitable for you.

Further Information

Refer to “Investor Profile” of the Singapore Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

■ You are investing in a collective investment scheme that is a sub-fund of the Luxembourg incorporated SICAV Threadneedle (Lux), and which seeks to achieve a real rate of return, i.e. above the rate of inflation (as measured by the US CPI Seasonally Adjusted Index) from income and capital appreciation.

■ The distribution policies of the Share Classes are as follows:

Share Classes whose denomination ends in a “P” or “C”: Dividend, if declared, will be distributed. Dividends may include an element of capital which will have an impact on capital appreciation. The payment of dividends will result in an immediate decrease in the net asset value per share regardless of whether or not they are paid out of capital.

Other Share Classes: No dividend distribution. Income, if any, will be re-invested.

Refer to “The SICAV”, “The Portfolios”, “Investment Objective, Focus and Approach”, and “Distribution Policy” of the Singapore Prospectus for further information on features of the product.

Investment Strategy

■ The Portfolio is actively managed and will invest globally principally in the equity and fixed income securities of government and corporate issuers, either directly or indirectly through financial derivative instruments and/or collective investment schemes. The Portfolio may also invest in forward currency exchange contracts and, when determined appropriate on a defensive basis, in cash and Money Market Instruments.

■ The Portfolio may also gain indirect exposure to commodities through, but not limited to, investment in collective investment schemes, securitised notes and/or financial derivative instruments where such derivatives’ underlying instruments are indices. The Portfolio will not invest in physical commodities or property.

■ For the purposes of managing liquidity, the Portfolio may hold cash deposits, Money Market Instruments and other cash-equivalent assets, including through UCIs.

■ **The Portfolio may use derivatives for investment purposes, hedging and efficient portfolio management.**

■ The Portfolio retains the flexibility to vary its exposure between asset classes where it deems necessary in order to achieve the investment objective.

■ Hedging between the currency of the Class and the base currency of the Portfolio will be carried out for Classes whose denomination ends in a “H” or “C”. These Classes will be hedged, with the objective of minimising currency risk exposure. This activity may increase or decrease the return to investors in those Classes.

Refer to “Investment Objective, Focus and Approach” of the Singapore Prospectus for further information on the investment strategy.

¹ The Singapore Prospectus is available for collection during normal Singapore business hours from Singapore distributors for the Portfolio or accessible at www.columbiathreadneedle.sg.

Parties Involved

WHO ARE YOU INVESTING WITH?

- The umbrella fund under which the Portfolio is constituted is Threadneedle (Lux) (the “SICAV”).
- The Management Company of the SICAV is Threadneedle Management Luxembourg S.A.
- The Sub-Advisor of the Portfolio is Threadneedle Asset Management Limited.
- The Depository for the SICAV is Citibank Europe plc, Luxembourg Branch.

Refer to “The SICAV”, “Management and Administration” and “Other Parties” of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:

Refer to “Risk Factors” of the Singapore Prospectus for further information on the risk of the product.

Market and Credit Risks

- **General market risks.**
 - The value of investments may fall as well as rise and you may not get back the sum originally invested, especially if investments are not held for the long term.
- **Inflation risks.**
 - Most bond funds offer limited capital growth potential and an income that is not linked to inflation. Therefore, inflation can affect the value of capital and income over time.
- **Issuer risks.**
 - The Portfolio invests in securities whose value would be significantly affected if the securities issuer either refused, was unable to, or was perceived to be unable to pay.
- **Exchange rate risks.**
 - Where investments are made by the Portfolio in assets that are denominated in currencies other than USD (the base currency of the Portfolio), changes in exchange rates may affect the value of your investments.
 - The Portfolio and share classes offered may not be denominated in SGD and you may therefore be exposed to additional exchange rate risks if your reference currency is SGD.

Liquidity Risks

- **The Portfolio is not listed in Singapore and you can redeem only on Valuation Dates (subject to the opening hours of the Singapore distributors).**
 - There is no secondary market for the Portfolio in Singapore. All redemption requests should be submitted in the manner set out in the Singapore Prospectus.
- **Your right to request for redemption may be suspended or deferred in certain circumstances.**

Product-Specific Risks

- **Interest rate risks.**
 - Changes in interest rates are likely to affect the values of fixed income securities held by the Portfolio. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- **Valuation risks.**
 - The Portfolio’s assets may sometimes be difficult to value objectively and the true value may not be recognised until assets are sold.
- **Volatility risks. The Portfolio may exhibit significant price volatility.**
- **Derivates risks.**
 - The use of derivatives by the Portfolio may increase the volatility of the Portfolio and may involve a small investment of cash relative to the magnitude of risk assumed. In addition, these techniques could result in a loss if the counterparty of the transaction does not perform as promised.
 - If the Management Company or the Sub-Advisor judges market conditions incorrectly or employs a strategy that does not correlate well with the Portfolio’s investments, these techniques could result in a loss.
 - **The use of derivatives for investment purposes may increase the risk profile of the Portfolio.**
- **Risks of commodity indices.**
 - Commodity indices, in which the Portfolio may invest indirectly, are affected by the underlying commodity markets which may perform very differently to traditional securities markets. Further, changes in the spot prices of the underlying commodities will not be exactly mirrored in the commodity derivatives in which the Portfolio invests. The price of these derivatives can be driven by speculators, and therefore may be extremely volatile.
- **No capital guarantee risks.**
 - Positive returns are not guaranteed and no form of capital guarantee applies.
- **Investments in funds risks.**
 - The Investment Policy allows the fund to invest principally in units of other collective investment schemes. Investors should consider the investment policy and asset composition in the underlying funds when assessing their portfolio exposure.
- **Sustainability risks.**
 - The Portfolio is potentially exposed to environmental, social or governance events or conditions that, if occurring, could cause a material negative impact on the value of the Portfolio’s investment.

FEES AND CHARGES

WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?

Payable directly by you

- You will need to pay the following fees and charges:

Initial Sales Charge*	5.00% of the amount invested
Redemption Charge	Currently nil
Switching Fee	0.75% of the net asset value of the acquired shares

*May be waived in whole or in part by a Singapore distributor, depending on the size of the subscription or upon local market considerations.

Additional fees may be payable by you to a Singapore distributor depending on the specific nature of services provided by that Singapore distributors to you. Please contact the relevant Singapore distributor for details.

Refer to "Fees and Charges" of the Singapore Prospectus for further information on fees and charges.

Payable by the Portfolio from invested proceeds

- The Portfolio will pay the following fees (per annum):

	Class A Shares
Asset Management Fee (paid to the Management Company)	1.35% of the value of the share class
a) Retained by Management Company	a) 40% to 50% of Asset Management Fee
b) Paid by Management Company to financial adviser (trailer fee)	b) 50% to 60% ² of Asset Management Fee
Operating Expenses (Paid to the Management Company)**	0.30% of the value of the share class

**Includes the depositary, domiciliary and administrative fee.

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

Valuations are performed on each Valuation Date. The indicative issue prices and redemption prices of the shares of the Portfolio are normally published in Singapore on www.columbiathreadneedle.sg within 1 Singapore business day immediately succeeding each Valuation Date.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COST IN DOING SO?

- The Management Company does not offer a right to cancel subscriptions into the Portfolio. You should however check whether your Singapore distributor will allow you to cancel your subscription into the Portfolio.
- You can exit the Portfolio by submitting your redemption form to the Singapore distributor from whom you had originally purchased your shares.
- Shares may be redeemed on any Valuation Date, subject to the opening hours of the relevant Singapore distributor.
- Redemption proceeds will normally be made to Singapore distributors within 3 Business Days and you should check with your Singapore distributor when you can expect to receive your redemption proceeds.
- The redemption price of your shares is determined as follows:
 - If you sell your shares before 3 p.m. (Luxembourg time) (or the Singapore time equivalent) on a Valuation Date, you should normally receive a price calculated on that Valuation Date.
 - If you sell your shares after 3 p.m. (Luxembourg time) (or the Singapore time equivalent) on a Valuation Date, you should normally receive a price calculated on the next Valuation Date.
 (Please note that certain Singapore distributors may impose an earlier cut-off time for receiving your redemption request.)

Refer to "Cancellation of Subscription", "Redemption of Shares" and "Obtaining Price Information in Singapore" of the Singapore Prospectus for further information on valuation and exiting from the product.

- The redemption proceeds that you will receive will be the redemption price per share multiplied by the number of shares redeemed, less any charges. An example is as follows:

1,000 shares	x	\$1.10	=	\$1,100	-	\$0	=	\$1,100
Redemption request		Redemption Price		Gross Redemption Proceeds		Redemption Charge*		Net Redemption Proceeds

*There is currently no redemption charge payable.

² Your financial adviser is required to disclose to you the amount of trailer fee it receives from the Management Company.
