PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

- The Portfolio is only suitable for investors who:
 - seek potential total return through income and capital appreciation;
 - seek diversification within their investments through exposure to emerging market short-term debt;
 - can tolerate the high volatility associated with emerging market debt;
 - are willing to take on a high level of risk; and
 - have a long-term investment horizon.

You should consult your financial adviser if in doubt whether this product is suitable for you.

Further Information

Refer to “Investor Profile” of the Singapore Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a collective investment scheme that is a sub-fund of the Luxembourg incorporated SICAV Threadneedle (Lux), and which is actively managed seeks to achieve total return from income and capital appreciation by investing principally in emerging market short-term bonds.
- The distribution policies of the Share Classes are as follows:

Share Classes whose denomination ends in a “P” or “C”: Dividend, if declared, will be distributed. Dividends may include an element of capital which will have an impact on capital appreciation. The payment of dividends will result in an immediate decrease in the net asset value per share regardless of whether or not they are paid out of capital.

Other Share Classes: No dividend distribution. Income, if any, will be re-invested.

Refer to “The SICAV”, “The Portfolios”, “Investment Objective, Focus and Approach”, and “Distribution Policy” of the Singapore Prospectus for further information on features of the product.

Investment Strategy

- The Portfolio will invest principally in a globally diversified range of transferable debt securities issued or guaranteed by emerging market sovereignties or supranational entities, or financial institutions or corporations headquartered in Emerging Market Countries.
- The Portfolio may also invest secondarily in debt securities issued or guaranteed by G-7 sovereignties or supranational entities and in credit linked notes.
- The Portfolio may invest in securities denominated in various currencies and will generally hedge non-U.S. Dollar exposures (maximum amount of non-U.S. Dollar exposure remaining unhedged in any one currency will not exceed 10% of the net assets of the Portfolio and will not exceed 35% in total).
- Up to 10% of the Portfolio’s net asset value may be invested in bonds traded on the China Interbank Bond Market using Bond Connect.
- For the purposes of managing liquidity, the Portfolio may hold cash deposits, Money Market Instruments and other cash-equivalent assets, including through UCIs.
- The Portfolio is actively managed in reference to the J.P. Morgan EMBI Global 3-5 Years Index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub Advisor’s risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index.
- **The Portfolio may use derivatives for investment purposes, hedging and efficient portfolio management.**
- Hedging between the currency of the Class and the base currency of the Portfolio will be carried out for Classes whose denomination ends in a “H” or “C”. These Classes will be hedged, with the objective of minimising currency risk exposure. This activity may increase or decrease the return to investors in those Classes.

Refer to “Investment Objective, Focus and Approach” of the Singapore Prospectus for further information on the investment strategy.

¹ The Singapore Prospectus is available for collection during normal Singapore business hours from Singapore distributors for the Portfolio or accessible at www.columbiathreadneedle.sg.

Parties Involved

WHO ARE YOU INVESTING WITH?

- The umbrella fund under which the Portfolio is constituted is Threadneedle (Lux) (the “SICAV”).
- The Management Company of the SICAV is Threadneedle Management Luxembourg S.A.
- The Sub-Advisor of the Portfolio is Threadneedle Asset Management Limited. The Sub-Advisor may delegate the discretionary investment management of part of the assets of the Portfolio to one or more third parties within the Ameriprise Financial, Inc. group of companies (currently delegated to Columbia Management Investment Advisers, LLC).
- The Depositary for the SICAV is Citibank Europe plc, Luxembourg Branch.

Refer to “The SICAV”, “Management and Administration” and “Other Parties” of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:

Refer to “Risk Factors” of the Singapore Prospectus for further information on the risk of the product.

Market and Credit Risks

- **General market risks.**
 - The value of investments may fall as well as rise and you may not get back the sum originally invested, especially if investments are not held for the long term.
- **Emerging markets risks.**
 - The Portfolio invests in markets where economic and regulatory risk can be significant. These factors can affect liquidity, settlement and asset values. Any such event can have a negative effect on the value of your investment.
- **Inflation risks.**
 - Most bond funds offer limited capital growth potential and an income that is not linked to inflation. Therefore, inflation can affect the value of capital and income over time.
- **Issuer risks.**
 - The Portfolio invests in securities whose value would be significantly affected if the securities issuer either refused, was unable to, or was perceived to be unable to pay.
- **Exchange rate risks.**
 - Where investments are made by the Portfolio in assets that are denominated in currencies other than USD (the base currency of the Portfolio), changes in exchange rates may affect the value of your investments.
 - The Portfolio and share classes offered may not be denominated in SGD and you may therefore be exposed to additional exchange rate risks if your reference currency is SGD.

Liquidity Risks

- **The Portfolio is not listed in Singapore and you can redeem only on Valuation Dates (subject to the opening hours of the Singapore distributors).**
 - There is no secondary market for the Portfolio in Singapore. All redemption requests should be submitted in the manner set out in the Singapore Prospectus.
- **Your right to request for redemption may be suspended or deferred in certain circumstances.**

Product-Specific Risks

- **Interest rate risks.**
 - Changes in interest rates are likely to affect the values of fixed income securities held by the Portfolio. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- **Liquidity risks.**
 - The Portfolio invests in assets that are not always readily saleable without suffering a discount to fair value. The Portfolio may have to lower the selling price, sell other investments or forego another, more appealing investment opportunity.
- **Volatility risks.**
 - The Portfolio may exhibit significant price volatility.
- **Derivates risks.**
 - The use of derivatives by the Portfolio may increase the volatility of the Portfolio and may involve a small investment of cash relative to the magnitude of risk assumed. In addition, these techniques could result in a loss if the counterparty of the transaction does not perform as promised.
 - If the Management Company or the Sub-Advisor judges market conditions incorrectly or employs a strategy that does not correlate well with the Portfolio’s investments, these techniques could result in a loss.

■ **Risks associated with China Interbank Bond Market via Northbound Trading Link under Bond Connect.**

- Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the China Interbank Bond Market may result in prices of certain debt securities traded on such market fluctuating significantly. The Portfolio investing in such market is therefore subject to liquidity and volatility risks. The bid and offer spreads of the prices of such securities may be large, and the Portfolios may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments. Investing in the China Interbank Bond Market via Bond Connect is also subject to regulatory risks. The relevant rules and regulations on these regimes are subject to change which may have potential retrospective effect.

■ **Risks associated with PRC Tax risk.**

- There are also uncertainties under the applicable PRC tax laws on the treatment of income tax and other tax categories payable in respect of trading in China Interbank Bond Market by eligible foreign institutional investors via Bond Connect. There is also the possibility of such laws being changed and taxes being applied retrospectively. Hence it is uncertain as to the Portfolio's tax liabilities for trading in China Interbank Bond Market via Bond Connect.

■ **Sustainability risks.**

- The Portfolio is potentially exposed to environmental, social or governance events or conditions that, if occurring, could cause a material negative impact on the value of the Portfolio's investment.

FEES AND CHARGES

WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?

Payable directly by you

- You will need to pay the following fees and charges:

Refer to "Fees and Charges" of the Singapore Prospectus for further information on fees and charges.

Initial Sales Charge*	3.00% of the amount invested (Class A Shares) 5.00% of the amount invested (Class Z Shares)
Redemption Charge	Currently nil
Switching Fee	0.75% of the net asset value of the acquired shares (for Class A and Class Z Shares)

**May be waived in whole or in part by a Singapore distributor, depending on the size of the subscription or upon local market considerations.*

Additional fees may be payable by you to a Singapore distributor depending on the specific nature of services provided by that Singapore distributors to you. Please contact the relevant Singapore distributor for details.

Payable by the Portfolio from invested proceeds

- The Portfolio will pay the following fees (per annum):

	Class A Shares	Class Z Shares
Asset Management Fee (paid to the Management Company)	1.30% of the value of the share class	0.60% of the value of the share class
a) Retained by Management Company	a) 40% to 50% of Asset Management Fee	a) 100% of Asset Management Fee
b) Paid by Management Company to financial adviser (trailer fee)	b) 50% to 60% ² of Asset Management Fee	b) 0% ² of Asset Management Fee
Operating Expenses (paid to the Management Company)**	0.20% of the value of the share class	0.15% of the value of the share class

***Includes the depositary, domiciliary and administrative fee.*

² Your financial adviser is required to disclose to you the amount of trailer fee it receives from the Management Company.

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

Valuations are performed on each Valuation Date. The indicative issue prices and redemption prices of the shares of the Portfolio are normally published in Singapore on www.columbiathreadneedle.sg within 1 Singapore business day immediately succeeding each Valuation Date.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COST IN DOING SO?

- The Management Company does not offer a right to cancel subscriptions into the Portfolio. You should however check whether your Singapore distributor will allow you to cancel your subscription into the Portfolio.
- You can exit the Portfolio by submitting your redemption form to the Singapore distributor from whom you had originally purchased your shares.
- Shares may be redeemed on any Valuation Date, subject to the opening hours of the relevant Singapore distributor.
- Redemption proceeds will normally be made to Singapore distributors within 3 Business Days and you should check with your Singapore distributor when you can expect to receive your redemption proceeds.
- The redemption price of your shares is determined as follows:
 - If you sell your shares before 3 p.m. (Luxembourg time) (or the Singapore time equivalent) on a Valuation Date, you should normally receive a price calculated on that Valuation Date.
 - If you sell your shares after 3 p.m. (Luxembourg time) (or the Singapore time equivalent) on a Valuation Date, you should normally receive a price calculated on the next Valuation Date. (Please note that certain Singapore distributors may impose an earlier cut-off time for receiving your redemption request.)

- The redemption proceeds that you will receive will be the redemption price per share multiplied by the number of shares redeemed, less any charges. An example is as follows:

$$\begin{array}{r} \underline{1,000 \text{ shares}} \\ \text{Redemption} \\ \text{request} \end{array} \times \begin{array}{r} \underline{\$1.10} \\ \text{Redemption} \\ \text{Price} \end{array} = \begin{array}{r} \underline{\$1,100} \\ \text{Gross Redemption} \\ \text{Proceeds} \end{array} - \begin{array}{r} \underline{\$0} \\ \text{Redemption} \\ \text{Charge}^* \end{array} = \begin{array}{r} \underline{\$1,100} \\ \text{Net Redemption} \\ \text{Proceeds} \end{array}$$

*There is currently no redemption charge payable.

Refer to “Cancellation of Subscription”, “Redemption of Shares” and “Obtaining Price Information in Singapore” of the Singapore Prospectus for further information on valuation and exiting from the product.
