Portfolio Name	**Date of Significant Event**	**Details before Significant Event**	**Details after Significant Event**
CT (Lux) American	20/11/2023	**Name change:** Threadneedle (Lux) – American	**Name change:** CT (Lux) American
	20/11/2023	**Investment objective and policy change:** The American Portfolio seeks to achieve capital appreciation. It looks to outperform the S&P 500 Index after the deduction of charges. The Portfolio is actively managed and invests principally in shares of companies domiciled in the US or which have significant US business operations. The Portfolio may further invest in other securities (including fixed income securities, other equities and Money Market Instruments). The Portfolio may use financial derivative instruments for hedging purposes. The Portfolio selects companies considered to have good prospects for share price growth, from any industry or economic sector, and whilst there is no restriction on size, investment tends to focus on larger companies, such as those included in the S&P 500 Index. For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposit at sight), and may hold bank deposits, money market instruments or money market funds for treasury purposes. In normal market conditions, investments in ancillary liquid assets, bank deposits, money market instruments or money market funds will not exceed 10% of the Portfolio's net asset value. The Portfolio is actively managed in reference to the S&P 500 Index. The index is broadly representative of the companies in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index.	**Investment objective and policy change:** The American Portfolio seeks to achieve capital appreciation. Portfolio Name	**Date of Significant Event**	**Details before Significant Event**	**Details after Significant Event**
	01/12/2011	**Name change:** Threadneedle (Lux) – US Equities	**Name change:** Threadneedle (Lux) – American
	01/12/2011	**Investment objective and policy change:** The US Equities Portfolio seeks to achieve capital appreciation by investing principally in a diversified portfolio of equity securities corporate issuers headquartered in the United States or exercising a predominant part of their activity in this country. Secondarily, the Portfolio may invest in other securities convertible into equity securities and/or warrants. The securities will generally be of companies with capitalisations that are similar to those of companies represented in the S&P 500 Index.	**Investment objective and policy change:** The American Portfolio seeks to achieve capital appreciation by investing principally in the equity securities of medium to large companies domiciled in North America or with significant North American operations. The Portfolio may further invest in other securities (including fixed income securities, other equities and Money Market Instruments).
CT (Lux) American Extended Alpha	20/11/2023	**Name change:** Threadneedle (Lux) – American Extended Alpha	**Name change:** CT (Lux) American Extended Alpha
CT (Lux) American Select	20/11/2023	**Name change:** Threadneedle (Lux) – American Select	**Name change:** CT (Lux) American Select
		Investment objective and policy change: The American Select Portfolio seeks to achieve capital appreciation by investing principally in the equity securities of companies domiciled in North America or which have significant North American operations. These may include large, medium and smaller companies. There will be no particular specialisation. The select investment approach means that the Portfolio has the flexibility to take significant stock and sector positions which may lead to increased levels of volatility. For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposit at sight), and may hold bank deposits, money market instruments or money market funds for treasury purposes. In normal market conditions, investments in ancillary liquid assets, bank deposits, money market instruments or money market funds will not exceed 10% of the Portfolio's net asset value. 		companies that manage ESG risks effectively are better positioned to address future challenges, and capitalise on unknown and known future business opportunities. Companies that lead on the most material ESG metrics should be well positioned to build competitive advantage and sustain their long-term future. The Portfolio also aims to exclude companies that breach accepted international standards and principles (e.g. the United Nations Global Compact). Companies in breach may be assessed as suitable for investment by the Portfolio, if in the opinion of the Sub-Advisor there are tangible mitigating factors for the company to be held. The Sub-Advisor ensures that at least: • 90% of equity securities issued by large companies domiciled in developed countries; and • 75% of equity securities issued by large companies domiciled in Emerging Market Countries, or by small and medium companies, held by the Portfolio are rated against the above measures. For the purposes of this test, small companies are those with a market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion. To support and enhance the promotion of environmental and social characteristics, the Sub-Advisor will seek proactive engagement with companies with a view to influencing management teams to improve their practices, for example on issues relating to carbon emissions. Further information on the Portfolio investment guidelines, including the Columbia Threadneedle ESG Materiality Rating methodology and engagement policy is available at columbiathreadneedle.com. The Portfolio is categorised as one that promotes environmental or social characteristics under Article 8 of the EU Regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).

CT (Lux) European Corporate Bond	20/11/2023	**Name change:** Threadneedle (Lux) – European Corporate Bond	**Name change:** CT (Lux) European Corporate Bond
	20/11/2023	**Investment objective and policy change:** The European Corporate Bond Portfolio seeks to achieve a total return from income and capital appreciation by investing in fixed income securities that are primarily denominated in Euro. The Portfolio will principally invest in a broad range of Investment Grade fixed income securities issued by companies domiciled in Europe or which have significant European operations. It may also invest in Investment Grade securities that are issued by sovereign and supranational borrowers. However, it is intended that the Portfolio will not invest more than 25% of its net assets in securities that are rated AAA (Standard & Poor's) or an equivalent rating from another leading rating agency. A maximum of 10% of the Portfolio's net assets can be invested in securities that are rated below Investment Grade. The Portfolio may invest in mortgage and asset-backed securities (the mortgage and asset-backed securities not exceeding 10% of the Portfolio's Net Asset Value) and CoCos (not exceeding 10% of the Portfolio's Net Asset Value). Where securities are denominated in a currency other than Euro it is intended that they will typically be hedged back into Euro. The Portfolio may use financial derivative instruments for the purpose of reducing risks or costs, i.e. where the use of a financial derivative instrument is economically appropriate. For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposit at sight), and may hold bank deposits, money market instruments or money market funds for treasury purposes. In normal market conditions, investments in ancillary liquid assets, bank deposits, money market instruments or money market funds will not exceed 10% of the Portfolio's net asset value. The Portfolio is actively managed in reference to the iBoxx Euro Corporate Bond Index. The index is broadly representative of the securities in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. Deviations from the index, including guidance on the	**Investment objective and policy change:** The European Corporate Bond Portfolio seeks to achieve a total return from income and capital appreciation by investing in fixed income securities that are primarily denominated in Euro. The Portfolio will principally invest in a broad range of Investment Grade fixed income securities issued by companies domiciled in Europe or which have significant European operations. It may also invest in Investment Grade securities that are issued by sovereign and supranational borrowers. However, it is intended that the Portfolio will not invest more than 25% of its net assets in securities that are rated AAA (Standard & Poor's) or an equivalent rating from another leading rating agency. A maximum of 10% of the Portfolio's net assets can be invested in securities that are rated below Investment Grade. The Portfolio may invest in mortgage and asset-backed securities (the mortgage and asset-backed securities not exceeding 10% of the Portfolio's Net Asset Value) and CoCos (not exceeding 10% of the Portfolio's Net Asset Value). Where securities are denominated in a currency other than Euro it is intended that they will typically be hedged back into Euro. The Portfolio may use financial derivative instruments for the purpose of reducing risks or costs, i.e. where the use of a financial derivative instrument is economically appropriate. For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposits at sight), and may also hold bank deposits, Money Market Instruments or money market funds for treasury purposes. In normal market conditions, investments in these assets or instruments will not exceed 10% of the Portfolio's Net Asset Value. The Portfolio is actively managed in reference to the iBoxx Euro Corporate Bond Index. The index is broadly representative of the securities in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The index is not designed to specifically consider environmental or social characteristics. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. Deviations from the index, including guidance on the

		Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index. **Promotion of Environmental and Social Characteristics** The Sub-Advisor promotes environmental and social characteristics by integrating a range of responsible investment measures into the investment decision-making process. Over rolling 12-month periods, the Portfolio aims to compare favourably with the ICE BofA European Currency High Yield Excluding Subordinated Financials Constrained Index according to the Columbia Threadneedle ESG Materiality Rating - a proprietary model which builds on the Sustainability and Accounting Standards Board (SASB®) framework. This model identifies material environmental, social and governance ("ESG") factors across a broad range of sectors, and provides an insight into the management focus and standards of operating practices of a company. The Sub-Advisor considers that companies that manage ESG risks effectively are better positioned to address future challenges, and capitalise on unknown and known future business opportunities. Companies that lead on the most material ESG metrics should be well positioned to build competitive advantage and sustain their long-term future. The Portfolio also aims to exclude companies that breach accepted international standards and principles (e.g. the United Nations Global Compact). Companies in breach may be assessed as suitable for investment by the Portfolio, if in the opinion of the Sub-Advisor there are tangible mitigating factors for the company to be held. The Sub-Advisor ensures that at least two thirds of the fixed income securities held by the Portfolio are rated against the above measures. To support and enhance the promotion of environmental and social characteristics, the Sub-Advisor will seek proactive engagement with companies with a view to influencing management teams to improve their practices, for example on issues relating to carbon emissions. Further information on the Portfolio investment guidelines, including the Columbia Threadneedle ESG Materiality Rating methodology and engagement policy is available at columbiathreadneedle.com. The Portfolio is categorised as one that promotes environmental or social characteristics under Article 8 of the EU Regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).	with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. 	31/07/2023	**Benchmark change:** EMIX Smaller European Companies Ex UK Index	**Benchmark change:** MSCI Europe ex UK Small Cap Index
	01/12/2021	**Investment objective and policy change:** The European Smaller Companies Portfolio seeks to achieve capital appreciation by investing principally in the equity securities of European Smaller Companies (excluding the United Kingdom). For this Portfolio, European Smaller Companies are companies that are not represented in the top 225 companies in the FTSE World Europe ex UK Index at the time of purchase. The Portfolio may use financial derivative instruments for hedging purposes. The Portfolio is actively managed in reference to the EMIX Smaller European Companies Ex UK Index. The index is broadly representative of the companies in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index.	**Investment objective and policy change:** The European Smaller Companies Portfolio seeks to achieve capital appreciation by investing principally in the equity securities of European Smaller Companies (excluding the United Kingdom). For this Portfolio, European Smaller Companies are companies that are not represented in the top 225 companies in the FTSE World Europe ex UK Index at the time of purchase. The Portfolio may use financial derivative instruments for hedging purposes. The Portfolio is actively managed in reference to the EMIX Smaller European Companies Ex UK Index. The index is broadly representative of the companies in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The Portfolio promotes environmental and social characteristics by aiming to compare favourably against the index over rolling 12-month periods when assessed according to the Columbia Threadneedle ESG Materiality Rating, as set out below. The index is not designed to specifically consider environmental or social characteristics. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index. **Promotion of Environmental and Social Characteristics** The Sub-Advisor promotes environmental and social characteristics by integrating a range of responsible investment measures into the investment decision-making process. Over rolling 12-month periods, the Portfolio aims to compare favourably with the EMIX Smaller European Companies Ex UK Index according to the Columbia Threadneedle ESG Materiality Rating - a proprietary model which builds on the Sustainability and

			Accounting Standards Board (SASB®) framework. This model identifies material environmental, social and governance ("ESG") factors across a broad range of sectors, and provides an insight into the management focus and standards of operating practices of a company. The Sub-Advisor considers that companies that manage ESG risks effectively are better positioned to address future challenges, and capitalise on unknown and known future business opportunities. Companies that lead on the most material ESG metrics should be well positioned to build competitive advantage and sustain their long-term future. The Portfolio also aims to exclude companies that breach accepted international standards and principles (e.g. the United Nations Global Compact). Companies in breach may be assessed as suitable for investment by the Portfolio, if in the opinion of the Sub-Advisor there are tangible mitigating factors for the company to be held. The Sub-Advisor ensures that at least: • 90% of equity securities issued by large companies domiciled in developed countries; and • 75% of equity securities issued by large companies domiciled in Emerging Market Countries, or by small and medium companies, held by the Portfolio are rated against the above measures. For the purposes of this test, small companies are those with a market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion. To support and enhance the promotion of environmental and social characteristics, the Sub-Advisor will seek proactive engagement with companies with a view to influencing management teams to improve their practices, for example on issues relating to carbon emissions. Further information on the Portfolio investment guidelines, including the Columbia Threadneedle ESG Materiality Rating methodology and engagement policy is available at columbiathreadneedle.com. The Portfolio is categorised as one that promotes environmental or social characteristics under Article 8 of the EU Regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).

		Grade and issued by a government or a supranational, public, private or voluntary and/or charitable sector organisation, whether they have a fixed, floating, variable or index-linked rate or have a zero coupon. These securities may include covered bonds, agency bonds, mortgage and asset-backed securities (the mortgage and asset-backed securities not exceeding 10% of the Portfolio's Net Asset Value) and Contingent Convertible Bonds (not exceeding 10% of the Portfolio's Net Asset Value). The Sub-Advisor will select debt securities that are rated as social investments under the Social Rating Methodology, as described below. Secondarily, the Portfolio may hold cash, near cash, Money Market Instruments and other debt securities. These encompass any wider, material business involvement exposures the issuers may have, such as to the production of alcohol, tobacco, gambling, adult entertainment or controversial weapons, or to activities deemed to breach the UN Global Compact. The Portfolio will not invest or have more than 10% of its net assets in debt securities that are rated below Investment Grade, provided that such securities are not rated below B- or equivalent by any NRSRO at the time of purchase. For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposit at sight) and may hold bank deposits, money market instruments or money market funds, for treasury purposes. In normal market conditions, investment in ancillary liquid assets, bank deposits, money market instruments or money market funds will not exceed 10% of the Portfolio's net asset value. The Portfolio is actively managed in reference to the ICE BofA Euro Non-Sovereign Index (50%) and ICE BofA Euro Corporate Euroland Issuers Index (50%). The index is broadly representative of the securities in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. Accordingly, the index is not designed to specifically consider social characteristics. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index. **Overview of the investment and assessment processes** <u>Investment process</u> The Sub-Advisor will select the debt securities based on credit analysis and the social rating and categorisation produced under the Social Rating Methodology. The Social Rating Methodology is a proprietary categorisation and rating model developed by the Sub-Advisor, which	of its net assets in all forms of debt securities issued by a government or a supranational, public, private or voluntary and/or charitable sector organisation, whether they have a fixed, floating, variable or index-linked rate or have a zero coupon. These securities may include covered bonds, agency bonds, mortgage and asset-backed securities (the mortgage and asset-backed securities not exceeding 10% of the Portfolio's Net Asset Value) and Contingent Convertible Bonds (not exceeding 10% of the Portfolio's Net Asset Value). The Portfolio will not invest or have more than 10% of its net assets in debt securities that are rated below Investment Grade, provided that such securities are not rated below B- or equivalent by any NRSRO at the time of purchase. For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposits at sight) and may also hold bank deposits, Money Market Instruments or money market funds, for treasury purposes. In normal market conditions, investment in these assets or instruments will not exceed 10% of the Portfolio's Net Asset Value. The Sub-Advisor will only select debt securities that are rated as social investments under the Social Rating Methodology, as described below, as well as ensuring that the issuers of these securities follow good governance practices. This means that the Sub-Advisor will apply these non-financial selection criteria to at least 90% of the total net assets of the Portfolio, excluding investments in ancillary liquid assets, bank deposits, money market instruments or money market funds for liquidity or treasury purposes. The Portfolio is not managed in reference to a benchmark. The ICE BofA Euro Non-Sovereign Index (50%) and ICE BofA Euro Corporate Euroland Issuers Index (50%) is currently used as a point of comparison against which the Portfolio's financial performance may be compared. Through the application of the investment and assessment process set out below, the Sub-Advisor expects to exclude at least 20% of the constituents of the index. The Portfolio is otherwise not subject to any constraints in relation to the comparator index, and as a result of the application of the Social Rating Methodology is expected to exhibit significant deviation from the index. **Overview of the investment and assessment processes** <u>Investment process</u> The Sub-Advisor's investment process to achieve the social objective is summarised as follows: 1. Creating the social universe of investments by identifying categories of bonds with higher potential for delivering one of 7 areas of social outcome (such as affordable housing, health and welfare, economic regeneration and development) while excluding those with negative social characteristics.

		analyses the social characteristics of each potential investment. Under the methodology, each investment will be analyzed under a two-stream process that: (i) assesses the broad social intensity and intentionality associated with the use of a bond's proceeds, to categorize it as either an impact investment, an investment with impact, as development finance or as being general financing; (ii) applies a three stage assessment model that examines and scores nine aspects of the focus and social outcomes attributable to a bond, across fields of social development such as affordable housing, health and welfare, education, employment, access to services and economic regeneration and development, to derive a numerical score that, subject to a de-minimis threshold, produces a social rating of minor, moderate, good or strong. A bond rated as, or whose rating falls, below the de-minimis threshold is subject to review and re-categorization as general financing. The categorization and ratings are then used by the Sub-Advisor in constructing the Portfolio. The Sub-Advisor will apply these non-financial selection criteria to at least 90% of the total net assets of the Portfolio excluding liquid assets, and will use measurement methods such as responsible investment rating and social outcome-based exclusion screening to ensure that the Portfolio's ESG profile and exposure to social outcome themes exceeds that of the index. The Portfolio is categorised as one that promotes environmental or social characteristics under Article 8 of the EU Regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR). <u>Assessment and research process</u> The Sub-Advisor has partnered with INCO (http://inco.co.com/), an organisation specialising in impact investment, to provide assistance in assessing and reporting on the social outcomes of the Portfolio and providing research on trends and practices relevant to impact investment. To that end, a Social Advisory Panel (or "SAP"), composed of 3 members nominated by the Sub-Advisor and 3 members nominated by INCO, has been established to review, advise on and monitor the application and development of the Social Rating Methodology as well as to review the actual social outcomes of investments that have been made by the Sub-Advisor. The SAP will be chaired by one of the members nominated by INCO. An annual social performance report, prepared by INCO and approved by the SAP, will be made available to investors. **Promotion of Social Characteristics** The Sub-Advisor promotes social characteristics. Further information on the Portfolio investment guidelines, including the Columbia Threadneedle ESG	2. Adhering to particular social norms to ensure that no bond held by the Portfolio violates set standards. 3. A focus on positive inclusion by carrying out a detailed assessment of the bond's contribution to positive social outcomes. 4. Ongoing governance, monitoring, engagement and reporting to maintain and enhance the Portfolio's social focus and standards. In applying the investment process, the Sub-Advisor will select the debt securities based on credit analysis and the social rating and categorisation produced under the Social Rating Methodology. The Social Rating Methodology is a proprietary categorisation and rating model developed by the Sub-Advisor, which analyses the social characteristics of each potential investment. Under the methodology, each investment will be analysed under a process that: (i) assesses the broad social intentionality associated with the use of a bond's proceeds, to categorise it as either an impact investment, an investment with impact, or as development finance, otherwise the investment is assessed as general financing and lies outside the social universe eligible for investment; (ii) assesses the broad social intensity by applying a three stage assessment model that examines nine characteristics of the social outcomes attributable to a bond to derive a numerical score that, subject to a de-minimis threshold, produces a social rating of minor, moderate, good or strong. The categorisation and ratings are then used by the Sub-Advisor in constructing the Portfolio. A bond rated as, or whose rating falls, below the de-minimis threshold is subject to review and re-categorisation as general financing. As part of its investment process, the Sub-Advisor assesses the Portfolio's investments to ensure that, while positively contributing to social outcomes, the bonds do not significantly harm other social (including environmental) sustainability objectives. The Sub-Advisor considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability factors through ensuring minimum standards, investment research and monitoring and engaging with issuers in respect of the PAI indicators detailed in the SFDR RTS Annex of the Prospectus. <u>Assessment and research process</u> The Sub-Advisor has partnered with INCO (http://inco.co.com/), an organisation specialising in impact investment, to provide assistance in assessing and reporting on the social outcomes of the Portfolio and providing research on trends and practices relevant to impact investment. To that end, a Social Advisory Panel (or "SAP"), composed of 2 members nominated by the Sub-Advisor,3 members nominated by INCO and 2 independent appointees, has been established to

		MSCI ACWI Index. The index is broadly representative of the companies in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The Portfolio promotes environmental and social characteristics by aiming to compare favourably against the index over rolling 12-month periods when assessed according to the Columbia Threadneedle ESG Materiality Rating, as set out below. The index is not designed to specifically consider environmental or social characteristics. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index. **Promotion of Environmental and Social Characteristics** The Sub-Advisor promotes environmental and social characteristics by integrating a range of responsible investment measures into the investment decision-making process. Over rolling 12-month periods, the Portfolio aims to compare favourably with the MSCI ACWI Index according to the Columbia Threadneedle ESG Materiality Rating - a proprietary model which builds on the Sustainability and Accounting Standards Board (SASB®) framework. This model identifies material environmental, social and governance ("ESG") factors across a broad range of sectors, and provides an insight into the management focus and standards of operating practices of a company. The Sub-Advisor considers that companies that manage ESG risks effectively are better positioned to address future challenges, and capitalise on unknown and known future business opportunities. Companies that lead on the most material ESG metrics should be well positioned to build competitive advantage and sustain their long-term future. The Portfolio also aims to exclude companies that breach accepted international standards and principles (e.g. the United Nations Global Compact). Companies in breach may be assessed as suitable for investment by the Portfolio, if in the opinion of the Sub-Advisor there are tangible mitigating factors for the company to be held. The Sub-Advisor ensures that at least: • 90% of equity securities issued by large companies domiciled in developed countries; and • 75% of equity securities issued by large companies domiciled in Emerging Market Countries, or by small and medium companies, held by the Portfolio are rated against the above measures. For the purposes of this test, small companies are those with a market capitalisation below €5 billion,	hold ancillary liquid assets (i.e. bank deposits at sight), and may hold bank deposits, Money Market Instruments or money market funds for treasury purposes. In normal market conditions, investments in these assets or instruments will not exceed 10% of the Portfolio's Net Asset Value. The Portfolio is actively managed in reference to the MSCI ACWI Index. The index is broadly representative of the companies in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The index is not designed to specifically consider environmental or social characteristics. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process. **Promotion of Environmental and Social Characteristics** The Sub-Advisor promotes environmental and social characteristics by integrating a range of responsible investment measures into the investment decision-making process, as well as ensuring that the companies in which the Portfolio invests follow good governance practices. Information about the environmental or social characteristics promoted by the Portfolio and their integration into the investment process is available in the SFDR RTS Annex of the Prospectus.

	04/11/2014	**Name change:** Threadneedle (Lux) – Multi Asset Target Alpha	**Name change:** Threadneedle (Lux) – Global Multi Asset Income
	04/11/2014	**Investment objective and policy change:** The Multi Asset Target Alpha Portfolio seeks to achieve an absolute return. The Portfolio will invest globally in equity, fixed income and currency markets, either directly, or indirectly through collective investment schemes and/or financial derivative instruments, and when determined appropriate cash and Money Market Instruments. The Portfolio will also gain indirect exposure to commodities, property or other assets through, but not limited to, investment in collective investment schemes, securitised notes and/or financial derivative instruments where such derivatives underlying instruments are indices. The Portfolio will not invest in physical commodities or property. The Portfolio may invest more than 10% and up to 100% of its assets in other UCITS or UCIs. The Sub-Advisor's investment process involves independently developing a current economic view based on fundamental analysis, then establishing the forward-looking view discounted in financial asset prices in the market. The Sub-Advisor will make asset allocation decisions for the benefit of the Portfolio based on disconnects identified between the current and forward-looking views. The Sub-Advisor will implement the strategy through exposure to various asset classes as described above (including through the use of both long and short financial derivative instruments), that when combined, display a low correlation to equity market returns.	**Investment objective and policy change:** The Global Multi Asset Income Portfolio seeks to achieve an income with the prospect of capital appreciation over the medium to long term. The Portfolio will invest principally in global fixed income and global equity securities. The Portfolio may further invest in cash and other securities globally (including Money Market Instruments, currencies, REITs, convertible debt securities and other asset classes). Threadneedle (Lux) – Global Smaller Companies</td><td>Name change:
CT (Lux) Global Smaller Companies</td></tr>
<tr><td>20/11/2023</td><td>Investment objective and policy change:
The Global Smaller Companies Portfolio seeks to achieve capital appreciation by investing principally in the equity securities of Global Smaller Companies. The Portfolio may further invest in other securities (including fixed income securities, other equities and Money Market Instruments).
The Portfolio is actively managed in reference to the MSCI World Small Cap Index. The index is broadly representative of the companies in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The Portfolio promotes environmental and social characteristics by aiming to compare favourably against the index over rolling 12-month periods when assessed according to the Columbia Threadneedle ESG Materiality Rating, as set out below. The index is not designed to specifically consider environmental or social characteristics. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index.
Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor’s risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index.
Promotion of Environmental and Social Characteristics
The Sub-Advisor promotes environmental and social characteristics by integrating a range of responsible investment measures into the investment decision-making process.
Over rolling 12-month periods, the Portfolio aims to compare favourably with the MSCI World Small Cap Index according to the Columbia Threadneedle ESG Materiality Rating - a proprietary model which builds on the Sustainability and Accounting Standards Board (SASB®) framework. This model identifies material environmental, social and governance (“ESG”) factors across a broad range of sectors, and provides an insight into the management focus and standards of operating practices of a company. The Sub-Advisor considers that companies that manage ESG risks effectively are better positioned to address future challenges, and capitalise on unknown and known future business opportunities. Companies that lead on the most material ESG metrics should be well positioned to build competitive advantage</td><td>Investment objective and policy change:
The Global Smaller Companies Portfolio seeks to achieve capital appreciation by investing principally in the equity securities of Global Smaller Companies. The Portfolio may further invest in other securities (including fixed income securities, other equities and Money Market Instruments).
For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposits at sight), and may also hold bank deposits, Money Market Instruments or money market funds for treasury purposes. In normal market conditions, investments in these assets or instruments will not exceed 10% of the Portfolio's Net Asset Value.
The Portfolio is actively managed in reference to the MSCI World Small Cap Index. The index is broadly representative of the companies in which the Portfolio invests, and provides a suitable target benchmark against which Portfolio performance will be measured and evaluated over time. The index is not designed to specifically consider environmental or social characteristics.

	29/11/2013	**Investment objective and policy change:** The European Smaller Companies Absolute Alpha Portfolio seeks to achieve an absolute return. The Portfolio will principally invest in equity securities, convertible debt securities and equity related derivative instruments of European Smaller Companies, and when determined appropriate cash and Money Market Instruments. Secondarily, the Portfolio may invest in securities and derivatives related to companies headquartered outside Europe. The Portfolio will take both long and short positions. Short positions (and possibly long positions) will be taken by the use of financial derivative instruments to include, but not limited to, equity swaps, total/excess return swaps, and futures and options related to individual equity securities, related to exchange traded funds and/or related to indices. Hedging may also be achieved through the purchase of exchange traded funds. The Portfolio will use financial derivative instruments and forward transactions for both efficient portfolio management and investment purposes. The use of derivatives may increase or decrease the risk profile of the Portfolio. The Net Asset Value of the Portfolio shall be expressed in Euro and investment decisions will be made from a Euro perspective.	**Investment objective and policy change:** The Global Smaller Companies Portfolio seeks to achieve capital appreciation by investing principally in the equity securities of smaller companies worldwide. The Portfolio may further invest in other securities (including fixed income securities, other equities and Money Market Instruments).

		For the purposes of managing liquidity, the Portfolio may hold ancillary liquid assets (i.e. bank deposit at sight), and may hold bank deposits, money market instruments or money market funds for treasury purposes. In normal market conditions, investments in ancillary liquid assets, bank deposits, money market instruments or money market funds will not exceed 10% of the Portfolio's net asset value. The Sub-Advisor focuses on selecting companies with strong or improving ESG characteristics, as outlined in the Portfolio's ESG Investment Guidelines. Those companies will demonstrate leadership through strong environmental, social, and governance practices. The Sub-Advisor will use measures that compare the ESG characteristics of the Portfolio against the MSCI Europe Index. This index also provides a helpful benchmark against which the financial performance can be compared. The MSCI Europe Index has been chosen for these purposes as a good representation of large and medium-sized companies within European developed market countries (including the UK). Accordingly, the index is not designed to specifically consider environmental or social characteristics. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index. In keeping with its ESG Investment Guidelines, the Portfolio will not invest in some sectors and companies in the index. The Net Asset Value of the Portfolio shall be expressed in Euro and investment decisions will be made from a Euro perspective. **ESG Investment Guidelines** The Sub-Advisor's environmental, social and governance ("ESG") investment criteria for the Portfolio are set out in its ESG Investment Guidelines, which may be amended from time-to-time. These are specific to the Portfolio and are over and above the Sub-Advisor's own normal ethical practices. The Portfolio's ESG Investment Guidelines are available on request. **Promotion of Environmental and Social Characteristics** The Sub-Advisor promotes environmental and social characteristics. The Portfolio is categorised as one that promotes environmental or social characteristics under Article 8 of the EU Regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR). Information about the environmental or social characteristics promoted by the Portfolio and their integration into the investment process is available in the SFDR RTS Annex of the Prospectus.	may hold ancillary liquid assets (i.e. bank deposits at sight), and may also hold bank deposits, Money Market Instruments or money market funds for treasury purposes. The Portfolio promotes environmental and social characteristics by aiming to compare favourably against the index over rolling 12-month periods when assessed according to the Columbia Threadneedle ESG Materiality Rating, as set out below. The index is not designed to specifically consider environmental or social characteristics. The Sub-Advisor has discretion to select investments with weightings different to the index, and that are not in the index, and the Portfolio may display significant divergence from the index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the Sub-Advisor's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In line with its active management strategy, there may be significant deviation from the index. **Promotion of Environmental and Social Characteristics** The Sub-Advisor promotes environmental and social characteristics by integrating a range of responsible investment measures into the investment decision-

			making process. Over rolling 12-month periods, the Portfolio aims to compare favourably with the EMIX Smaller European Companies Index according to the Columbia Threadneedle ESG Materiality Rating - a proprietary model which builds on the Sustainability and Accounting Standards Board (SASB®) framework. This model identifies material environmental, social and governance ("ESG") factors across a broad range of sectors, and provides an insight into the management focus and standards of operating practices of a company. The Sub-Advisor considers that companies that manage ESG risks effectively are better positioned to address future challenges, and capitalise on unknown and known future business opportunities. Companies that lead on the most material ESG metrics should be well positioned to build competitive advantage and sustain their long-term future. The Portfolio also aims to exclude companies that breach accepted international standards and principles (e.g. the United Nations Global Compact). Companies in breach may be assessed as suitable for investment by the Portfolio, if in the opinion of the Sub-Advisor there are tangible mitigating factors for the company to be held. The Sub-Advisor ensures that at least: • 90% of equity securities issued by large companies domiciled in developed countries; and • 75% of equity securities issued by large companies domiciled in Emerging Market Countries, or by small and medium companies, held by the Portfolio are rated against the above measures. For the purposes of this test, small companies are those with a market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion. To support and enhance the promotion of environmental and social characteristics, the Sub-Advisor will seek proactive engagement with companies with a view to influencing management teams to improve their practices, for example on issues relating to carbon emissions. Further information on the Portfolio investment guidelines, including the Columbia Threadneedle ESG Materiality Rating methodology and engagement policy is available at columbiathreadneedle.com. The Portfolio is categorised as one that promotes environmental or social characteristics under Article 8 of the EU Regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).

	20/11/2023	**Name change:** Columbia Threadneedle (Lux) – Sustainable Outcomes Global Equity	**Name change:** CT (Lux) Sustainable Outcomes Global Equity
CT (Lux) Sustainable Outcomes Global Equity	20/11/2023	**Investment objective and policy change:** **Objective** to generate capital growth through investment in companies that are positively exposed to sustainable outcome themes through their products and services and display strong or improving environmental, social and governance (ESG) practices. **Investment Policy** The fund is actively managed and invests a minimum of 90% of its total net assets in the equity securities of companies globally, including through depositary receipts. Such investment may include the equity securities of companies in emerging market countries which may represent a core part of the fund's investments. For the purposes of managing liquidity, the fund may hold ancillary liquid assets (i.e. bank deposits at sight) and may hold bank deposits, money market instruments or money market funds for treasury purposes. In normal market conditions, investment in these assets and instruments will not exceed 10% of the fund's net asset value. The investment manager focusses on selecting companies delivering sustainable outcomes or progressing towards the delivery of sustainable outcomes, as outlined in the fund's Sustainable Outcomes Investment Guidelines. Those companies will offer products and services aligned to the fund's sustainable outcome themes and demonstrate strong or improving ESG practices. The fund is actively managed in reference to the MSCI ACWI Index. The fund looks to outperform the index over rolling 5 year periods, after deduction of charges. The index is broadly representative of the companies in which the fund invests and provides a suitable target index against which fund performance will be measured and evaluated over time. Accordingly, the index is not designed to specifically consider environmental or social characteristics. The investment manager has discretion to select investments with weightings different to the index, and that are not in the index, and the fund may display significant divergence from the index. Guidelines on the level of risk relative to the index will be considered as part of the investment manager's risk monitoring process, to ensure the overall level of risk is broadly consistent with the index. In keeping with its Sustainable Outcomes Investment Guidelines, the fund may not invest in some sectors and companies in the index. **Sustainable Outcomes Investment Guidelines:**	**Investment objective and policy change:** **Objective** to generate capital growth by investing in companies globally that are delivering positive sustainable outcomes for the environment and/or society through their products and services, and display strong environmental, social and governance (ESG) practices. **Investment Policy** The fund is actively managed and invests at least 90% of its total net assets in the equity securities of companies located anywhere in the world, including through depositary receipts, subject to the fund's sustainable outcomes criteria. This includes companies located in emerging market countries which may represent a core part of the fund's investments. For the purposes of managing liquidity, the fund may hold ancillary liquid assets (i.e. bank deposits at sight), and may also hold bank deposits, money market instruments or money market funds for treasury purposes. In normal market conditions, investment in these assets or instruments will not exceed 10% of the fund's net asset value. The fund is actively managed in reference to the MSCI ACWI Index. The fund looks to outperform the index over rolling 5-year periods, after deduction of charges. The index is broadly representative of the companies in which the fund invests and provides a suitable target index against which fund performance will be measured and evaluated over time. The index is used for the purposes above and is not intended to be aligned with or used to attain the sustainable investment objective of the fund. The investment manager has discretion to select investments with weightings different to the index, and that are not in the index, and as a result of its sustainable investment objective, the fund will display significant divergence from the index. Deviations from the index, including guidance on the level of risk relative to the index, will be considered as part of the investment manager's risk monitoring process. **Sustainable Outcomes Investment Guidelines:** The investment manager has developed its own Sustainable Outcomes Investment Guidelines for the fund, which may be amended from time to time. The two main components of these Guidelines are the application of a sustainable outcomes framework and the application of sustainable outcomes-based exclusions. The investment manager considers the principal adverse impacts ("PAIs") of its investment decisions that may negatively harm sustainability

		The investment manager has developed its own Sustainable Outcomes Investment criteria for the fund as set out in its Sustainable Outcomes Investment Guidelines, which may be amended from time to time. These are specific to the fund and are over and above the investment manager's normal responsible investment practices. The fund's Sustainable Outcomes Investment Guidelines are available on request and on the Columbia Threadneedle Investments website. There are two main components to the Sustainable Outcomes Investment Guidelines as outlined below: 1) Within the universe of approved investments, the framework against which the investment manager will assess its investments may include the extent to which companies: • currently have the potential and are seeking to develop products and services that contribute towards a better future (such as in education, clean technology, healthcare, safety and security); • evidence strong or improving ESG practices within their sectors which means that the investment manager may invest in companies that at the time of investment do not demonstrate strong ESG practices, but are in the process of transitioning to such practices. 2) The investment manager will apply sustainable outcome-based exclusion screening to the fund's investments, which aims to exclude companies that are unable to satisfy the fund's Sustainable Outcomes Investment Guidelines from time to time. By way of example, it may seek to exclude companies where a substantial element of the business revenue is derived from products or services such as alcohol, tobacco, gambling, adult entertainment, the manufacture of military weapons, civilian firearms and nuclear power. The investment manager will apply these non-financial selection criteria to at least 90% of the total net assets of the fund, excluding ancillary liquid assets, bank deposits, money market funds or money market instruments for liquidity or treasury purposes, and will use measurement methods such as responsible investment rating and sustainable outcome-based exclusion screening to ensure that the fund's ESG profile and exposure to sustainable outcome themes exceeds that of the index. In addition to these measurements, the investment manager will publish an annual impact report. The investment manager will monitor its investments against the fund's Sustainable Outcomes Investment Guidelines and may engage in dialogue with such companies if it believes that the standards and practices applied by these companies can be improved. In evaluating the investment universe, the investment manager may refer to additional sources, such as external rating providers that score companies on their ESG performance, as well as the investment manager's	factors through exclusions, investment research and monitoring and engagement of companies. The Sustainable Investment Guidelines and consideration of PAIs are described in the SFDR RTS Annex of the Prospectus. Columbia Threadneedle Investments is a signatory to the Net Zero Asset Managers Initiative ("NZAMI") and has committed to an ambition, in partnership with clients, to reach net zero emissions by 2050 or sooner for a range of assets, including the fund. Accordingly, the investment manager will use proactive engagement with companies to assist with progressing this ambition. If after an appropriate period of engagement, a high emitting company held in the fund does not show progress in meeting minimum standards considered necessary for continued investment, then the fund will disinvest from the company. **Derivatives and techniques** The fund may use derivatives for hedging (reducing risks), but not for investment purposes. **SFDR Information** The fund is considered to be within the scope of Article 9 of SFDR as it has sustainable investment as its objective. Further information on the fund's investment guidelines is included in the Sustainable Outcomes Investment Guidelines available at columbiathreadneedle.com. The investment manager publishes a sustainable outcome report each year which is also available at www.columbiathreadneedle.com. Please also refer to the General Sustainability Disclosures Appendix of the Prospectus for further information. Information about the sustainable investment objective of the Portfolio is available in the SFDR RTS Annex of the Prospectus.
